PREFACE

This is the ninth edition of the *California Statistical Abstract,* a compilation of data on social, political, economic and physical aspects of the State. The volume is a cooperative effort of various state agencies and several private organizations, noted in the Appendix on pages 227–8. Material is edited by the California Department of Finance, Budget Division, Financial and Population Research Section. Additional information may be obtained from the agencies cited in source notes. If more specific information is desired, users are welcome to write to the Department of Finance, Room 1197, State Capitol, Sacramento, California 95814. Requests will be forwarded to the appropriate agency for reply.

Several new tables have been added. These include data on production workers in manufacturing; federal government expenditures in California, by agency; per capita income by county; facilities certified for participation in Medicare and Medi-Cal; commercial landings of bonito and squid; expenditures on streets and roads for construction, and maintenance separately; and the primary election held June 4, 1968.

The Department of Finance welcomes suggestions for improvement of the *Abstract,* and ways in which it may be developed into an even more useful compilation of data series on the State.

CONTENTS

Section		Page
Introduction		ix
A. Area, Geography and Climate	Land area—Government property—State parks—Elevations—Climatological data	1
B. Population	Population of the State—Population for counties and cities	9
C. Labor Force and Employment	Civilian labor force and employment—Nonagricultural wage and salary employment — Covered employment — Unemployment—Labor turnover rates—Hours and earnings—Work injuries—Workmen's compensation—Union membership—Work stoppages—Employment service placements—Manpower training	17
D. Income and Cost-of-Living	Bank and corporation income—Personal income—Personal tax returns—Consumer price indices	49
E. Health and Welfare	Vital statistics—Public health—Prison population—Youth authority wards—Vehicle code violations—Unemployment insurance activities—Dissability insurance activities—Public assistance expenditures	63
F. Education	Educational attainment—School personnel—Expense of education—Average daily attendance—Enrollments—Graduates—Locations of institutions	91
G. Resource Industries	Water conditions—Irrigated farm land—Dams and reservoirs—State water project—Agriculture—Farms—Crop production—Cash receipts—Leading commodities—Forestry—Lumber production—Fishing—Fish landings—Mineral production	99
H. Manufacturing	Employment—Payroll—Value added—Capital expenditures	131
I. Defense-Aerospace	Prime contract awards—Major contractors—Employment—Scientists	135
J. Construction	Nonresidential building permits—Residential permits	139
K. Transportation	Highway mileage—Construction expenditures—Motor vehicle fuel gallonage—Traffic entering California—Registrations—Drivers' licenses—Driver control actions—Accidents—Transportation revenues—Foreign trade—Waterborne cargo—Airborne trade—Airport activity	143
L. Public Utilities	Electricity production and use—Natural gas—Number of telephones—Average monthly utility bills	157

CONTENTS—Continued

Section — Page

M. Trade and Services ____ 161
Wholesale trade—Retail Trade—Taxable sales—Services

N. Banking and Finance ____ 193
Bank deposits—Savings and loan association assets and loans—Bank loans—Insurance premiums written

O. Public Finance ____ 197
Internal revenue collections—Federal aid payments—State revenues and expenditures—Private car tax assessments—Assessed valuation of property—Financial transactions concerning counties, cities, school and special districts—State bonds outstanding

P. Elections ____ 213
Registration—Vote cast—Voting precincts

Q. Comparative Statistics ____ 221
Data for the 50 states—Population—Employment—Hours and earnings — Income — Defense-aerospace contracts — Manufacturing — Trade and services—Agriculture

Appendix: Contributors ____ 227

Index ____ 229

INTRODUCTION

California covers an area of 158,693 sqnare miles ɔetwcen the 32nd and 42nd parallels north latitnde ɔn the Pacific Coast. The State is well known for its ɛmperate climate which has attracted millions of ɔeople to the coastal cities. Los Angeles-Long Beach ranks as the third largest metropolitan area in the Jnited States, and San Francisco-Oakland as the ixth. Topographical and temperatnre extremes occur n the interior areas, however. California inclndes Monnt Whitney, the highest peak in the contignous Jnited States, at 14,495 feet above sea level, and Death Valley, 282 feet below sea level, the lowest ɔoint in the Western Hemisphere. The average July naximnm temperature ranges from 64 degrees in San Francisco to 107 in Imperial Connty. Overall, Cali-ornia has the largest popnlation and personal income ɔf any state, and is the leading agricnltural state in erms of both variety and valne of prodnction. Cali-ornia is one of the leading indnstrial states of the Nation, and the first in defense-aerospace manufac-uring, research and development. The State's major ities, besides being centers of industrial activity, epresent financial and commercial centers important o the entire West Coast. The coastal areas are given ɔrimarily to lnmber and specialty crop prodnction; he Imperial Valley to vegetables; and the large Cen-ral Valley to the major volnme crops for which the State is known. The State is also the leading prodncer ɔf agricultural prodncts for export to foreign coun-ries.

POPULATION

The population of the State has doubled every 20 ears since 1860. In recent years the increase has been t a rate approximately 1,500 persons per day. In the ast 10 years the civilian population increased on the verage abont 560.000 per year.

California's popnlation as of July 1, 1968, was 9.782.000. This represented a gain of 304.000, or 1.5 ɔercent dnring the 12 prceeding months. A net total ɔf approximately 141.000 civilian residents moved to California between Jnly 1, 1967 and 1968. The natural ncrease during the year amonnted to 176.000. Until ecently, net migration into California exceeded 300,-00 annually and in 1965 accounted for approximately 2.6 percent of the State's civilian population gain. The nnmber of persons moving to the State has ex-eeded the number departing by 2.3 million since 1960.

California is one of the most urbanized states in he Nation. At the time of the Censns of 1960, only he District of Colnmbia, whose population was 100 ɔercent nrban. and New Jersey, with 88.6 percent, xceeded Rhode Island and California which were irtually tied at 86.4 percent nrban.

As of mid-1968, approximately 60 percent of the State's population lived in the ten sonthernmost coun-ies. Of these, Los Angeles, with 7,101,400 residents, s the most populons in the United States. California's econd most populous county, Orange, is also among the sonthern ten. With 4,589,800 people, the nine-county San Francisco Bay Area contained 23 percent of the State's population.

California has a smaller proportion of residents 65 years or older than does the United States as a whole, and somewhat larger proportion of the working ages from 20 to 65.

Department of Finance projections of population at five-year intervals through July 1, 1990, are as follows:

Year	
1975	23,575,000
1980	26,389,000
1985	29,545,000
1990	32,595,000

PERSONAL INCOME

Personal income of California residents reached a record $70.2 billion in 1967, 11.2 percent of all U.S. income allocated by states. Two-thirds of California's personal income is received in the form of wages and salaries. Receipts from this sonrce amounted to $47.8 billion in 1967. Property income totaled $10.0 billion, 14.2 percent of all income, while proprietors' income was $6.2 billion or 8.8 percent. Transfer payments added $6.4 billion or 9.0 percent.

Manufacturing is the largest source of income, accounting for one-fonrth of the total derived from participation in cnrrent prodnction. Trade is second in importance, followed by the service industries and government.

LABOR FORCE AND EMPLOYMENT

California's civilian labor force averaged 7,833,000 dnring 1967, an increase of 238,000, or 3.1 percent, from 1966. Dnring the past ten years the relative growth in California's labor force has been more than twice that of the Nation—35.1 percent compared with 15.6 percent.

Average civilian employment in the State increased by 224,000 between 1966 and 1967 to reach a new high of 7.444,000. An average of 389,000 California workers were unemployed during the year, or some 5.0 percent of the labor force. This unemployment rate was about the same as that for 1966.

California nonagricultural employment established a new record of 6,363,400 wage and salary workers in 1967. On the average, 216,500 more persons were working in nonfarm indnstries in the latest year than in 1966, a job growth of 3.5 percent. Annnal employment in every major industry division except mining and constrnction reached a new high in 1967.

Average weekly earnings of manufacturing production workers increased to an all-time high of $132.92. Honrly earnings averaged $3.29, also a new record. These earnings figures were substantially above the national averages of $114.90 and $2.83, respectively. The factory work week in California averaged 40.4 honrs.

MANUFACTURING

California is the Nation's second-ranked state in value added by manufacturing. In 1966, California, according to the Annual Survey of Manufactures, produced $21.3 billion in value added, 8.5 percent of the national total, and up from $19.0 billion in 1965. Industry detail is not yet available past 1963. In that year, some $2.7 billion was added by manufacturers of transportation equipment. Food and food product producers ranked second with $2.5 billion, while electrical machinery firms came third with $2.2 billion.

In 1963 California was first among the ten leading U.S. industrial states in the manufacture of food and kindred products ($2.5 billion), in lumber and wood products ($512 million), and in miscellaneous manufactures ($1.9 billion), and second in petroleum products ($497 million) and transportation equipment ($2.7 billion).

The Los Angeles-Long Beach Metropolitan Area accounted for approximately 52 percent ($8.9 billion) of value added by California manufacturers, and the San Francisco-Oakland Metropolitan Area for 15 percent ($2.6 billion). Nationally, only the New York and Chicago Metropolitan Areas exceeded the Los Angeles-Long Beach area in value added.

In 1966 expenditures for plant and equipment came to $1,469 million, approximately 7.3 percent of the U.S. total. During 1963 the industries making the largest investments were food and kindred products ($142 million), transportation equipment ($158 million) and electrical machinery ($103 million). During the 1960–66 interval more than $7.1 billion was spent on all new manufacturing plant and equipment in the State.

CORPORATE INCOME

Net income of more than $5.6 billion allocable to California operations was reported by 124,690 active banks and corporations operating in the State during 1966. Manufacturing industries, with earnings of $2.3 billion, accounted for more than 40 percent of the total. The public utilities group, with $1.1 billion, was in second place, followed by trade ($951 million), finance, insurance and real estate ($587 million), and mining and oil production ($255 million).

FOREIGN TRADE

Exports moving through customs districts in the State do not necessarily originate in California, nor are imports necessarily bound for California destinations. The State, however, is a major producer of goods for export, and a major market for imports. A study made by the United States Department of Commerce shows that California in 1963 ranked first among all states in the value of manufactured exports and of agricultural products which were exported.

The leading export products in 1966 were machinery and vehicles, food, textile fibers and manufactures, and metals and manufactures. During 1967 more than $2.6 billion of exports for world trade moved through California customs districts, while somewhat less than $2.4 billion of imports entered the United States via California, for a world trade total of nearly $5.0 billion. The value of exports was 12.7 percent above the 1966 level. There was a 3.7 percent gain in imports into the State.

AGRICULTURE

According to the 1964 U.S. Census of Agriculture there were 80,846 farms in California and about 37 million acres of farm land. Between 1959 and 1964 the number of farms declined by 19 percent, the amount of farm land rose by 0.3 percent and the average size of farms increased by 23 percent.

California continues to be the Nation's leading agricultural producer. Cash receipts received by California farmers during 1967 totaled $3.9 billion, $117 million below the 1966 level. Sales of all crops were an estimated $2.3 billion and accounted for 60 percent of total receipts. Livestock products earned $1.5 billion or 40 percent.

WATER RESOURCES

California's water supply, including its share of interstate waters, is generally ample to meet the State's present and foreseeable needs. However, meeting these needs requires a large-scale transport of water between the northern and southern parts of the State. In a major effort to implement this transport, the Legislature and the voters of California in 1960 authorized the construction and financing of the California State Water Project. This project will complement the extensive water development in California by the Federal Government and by local water agencies.

The California State Water Project will provide for the delivery of approximately 4,230,000 acre-feet annually to water service agencies from Plumas County to the Mexican border. Construction on the project commenced in 1957 with funds appropriated by the Legislature from the State Water Fund. It is presently well on its way to completion. First water deliveries were made to the San Joaquin Valley in 1968, and are scheduled for Southern California in 1971. The great majority of the financing of the California State Water Project was provided for by the authorization of general obligations bonds in the amount of $1.75 billion, of which $950 million has been marketed by June 1968. In addition, $150 million in revenue bonds had been sold by that date. Project revenues are anticipated to be fully adequate to repay the reimbursable costs of the project.

Planning studies are currently in progress by the California Department of Water Resources and other water agencies to define additional works necessary to meet water demands beyond the year 1990. These studies include consideration of the most effective utilization of water resources of the western states.

METROPOLITAN AREAS

Much of the data in this *Abstract* are reported for metropolitan areas in addition to totals for counties and the entire State. There are now 14 standard

metropolitan statistical areas in the State. The table below summarizes the metropolitan areas and the counties which they include. In addition, the map on page XIII shows the areas graphically.

Metropolitan Area	*County*
Anaheim-Santa Ana-Garden Grove	Orange
Bakersfield	Kern
Fresno	Fresno
Los Angeles-Long Beach	Los Angeles
Oxnard-Ventura	Ventura
Sacramento	Placer, Sacramento and Yolo
San Bernardino-Riverside-Ontario	San Bernardino and Riverside
San Diego	San Diego
San Francisco-Oakland	Alameda, Contra Costa, Marin, San Francisco, and San Mateo
San Jose	Santa Clara
Santa Barbara	Santa Barbara
Stockton	San Joaquin
Vallejo-Napa	Napa and Solano
Salinas-Monterey	Monterey

The metropolitan areas cover 43.8 percent of the State's area, and include 90.5 percent of the population, and approximately 92 percent of the non-agricultural employment.

SECTION A.

AREA, GEOGRAPHY AND CLIMATE

This section summarizes data relating to the land and water areas of the State, temperature and precipitation. The basic sources of these data are the federal agencies responsible for surveying and mapping the United States and for recording its weather. Information on federal and state parks and monuments is reported by various government agencies.

The plate on page 8 shows the geographical pattern of precipitation throughout California, as indicated by lines of equal normal annual precipitation. These lines generalize records and estimates for a large number of weather stations in all parts of the State.

The introduction to Section G, Resource Industries, also includes a generalized description of precipitation in California during the water year 1966–67.

TABLE A-1

AREA OF CALIFORNIA

Type	Square miles	Acres
Gross area of State	158,693	101,563,520
Land area [a]	156,537	100,183,680
Inland water [b]	2,156	1,379,840
Coastal water [c]	69	44,160

[a] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[b] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the ocean or bays.

[c] Water other than inland water. Much of the water adjacent to the State and falling under its jurisdiction does not belong to any particular county. The State area as shown above includes only the water which could be assigned to the counties and subdivisions of the counties. The definition adopted by the Bureau of the Census, characterizes this water as "inland water."

TABLE A-3

LAND AREAS, BY MAJOR CLASS OF LAND

January 1, 1963

Class of land	Acres
Total	100,207,000
Forest land	42,541,000
Commercial [a]	17,391,000
Productive-Reserved [b]	1,194,000
Unproductive [c]	23,956,000
Crop land [d]	11,815,000
Urban and suburban land [e]	2,068,000
Other land	43,783,000

[a] Forest land which is producing or capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation.
[b] Productive public forest land withdrawn from timber utilization through statute or administrative regulation.
[c] Forest land incapable of yielding crops of industrial wood because of adverse site conditions.
[d] As reported by 1964 Census of Agriculture. Excludes land cultivated in developing improved pasture.
[e] Residential areas containing at least 5 homes, with a density of one home or more on each two acres; industrial and commercial development, alone or in combination with residential development; and the actively occupied portions of military reservations—as delineated by land and water use specialists of the Department of Water Resources.

TABLE A-9

ALTITUDES OF SELECTED CALIFORNIA PEAKS

Summit	Rank among California peaks	Feet above sea level	County location
Barnard, Mount	14	13,990	Inyo-Tulare
Langley, Mount	10	14,042	Inyo-Tulare
Middle Palisade	11	14,040	Fresno-Inyo
Muir, Mount	13	14,015	Inyo-Tulare
North Palisade	4	14,242	Fresno-Inyo
Russell, Mount	8	14,086	Inyo-Tulare
Shasta, Mount	5	14,162	Siskiyou
Sill, Mount	6	14,162	Fresno-Inyo
Split Mountain	9	14,058	Fresno-Inyo
Tyndall, Mount	12	14,018	Inyo-Tulare
White Mountain Peak	3	14,246	Mono
Whitney, Mount	1	14,494	Inyo-Tulare
Williamson, Mount [a]	2	14,375	Inyo

[a] The east peak of Mt. Williamson has an elevation of 14,125 feet, which gives it seventh rank among California peaks.

SECTION B.

POPULATION

The tables in this Section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Pacific Division and the Nation are also shown.

All figures on the total population of California through 1949 and those for April 1, 1950 and April 1, 1960 are from publications of the United States Bureau of the Census, and represent decennial census counts or estimates prepared by that agency. All estimates of the civilian population and estimates of the total population for the years 1950 to 1968 were prepared by the Department of Finance and are based on the analysis of components of population change summarized in Table B-3. Data used in the preparation of these estimates have been obtained from the Bureau of Vital Statistics, Department of Public Health; the Bureau of Education Research, Department of Education; the State Selective Service System, the United States Department of Defense; and the United States Department of Commerce, Bureau of the Census.

The Department of Finance publishes annual reports on the State's population, presenting additional material which includes current estimates of the State and county populations. A series of periodic reports is published listing current estimates prepared by the Department at the request of various California cities.

Occasional reports of California's population composition are published as data become available.

TABLE B-2

ESTIMATED TOTAL POPULATION[a] OF CALIFORNIA, 1900-49
(Population in thousands)

Year (July 1)	Total population	Annual change		Year (July 1)	Total population	Annual change	
		Number	Percent			Number	Percent

TABLE B-3

ESTIMATED COMPONENTS OF CHANGE IN CALIFORNIA'S CIVILIAN POPULATION, 1950-68

Year (July 1)	Civilian population	Net change	Net migration	Natural increase	Loss to military[a]
1950	10,472,000	311,000	155,000	146,000	+10,000
1951	10,754,000	282,000	268,000	149,000	—135,000
1952	11,194,000	440,000	284,000	163,000	—7,000
1953	11,681,000	487,000	307,000	181,000	—1,000
1954	12,177,000	496,000	289,000	195,000	+12,000
1955	12,668,000	491,000	273,000	193,000	+25,000
1956	13,247,000	579,000	364,000	208,000	+7,000
1957	13,848,000	601,000	388,000	221,000	—8,000
1958	14,410,000	562,000	325,000	226,000	+11,000
1959	14,964,000	554,000	329,000	224,000	+1,000
1960	15,567,000	603,000	368,000	231,000	+4,000
1961	16,163,000	596,000	346,000	244,000	+6,000
1962	16,737,000	574,000	353,000	241,000	—20,000
1963	17,349,000	612,000	369,000	234,000	+9,000
1964	17,902,000	553,000	352,000	230,000	—29,000
1965	18,417,000	515,000	310,000	217,000	—12,000
1966	18,784,000	367,000	230,000	185,000	—48,000
1967	19,118,000	334,000	195,000	184,000	—45,000
1968	19,408,000	290,000	141,000	176,000	—27,000

[a] Negative figure indicates net loss of civilians to the Armed Forces through induction and enlistment; positive figure indicates net gain of civilians from the Armed Forces through release.

SECTION C.

LABOR FORCE AND EMPLOYMENT

This section presents statistics relating to the civilian labor force of California, including employment, unemployment, hours of work, earnings, apprenticeship, work injuries, union membership, and work stoppages. Employment covered under the Unemployment Insurance provisions of the California Unemployment Insurance Code is regularly reported in *California Employment and Payrolls,* published quarterly by the Department of Employment. Agricultural employment covered *only* for purposes of Disability Insurance is regularly reported in *California Employment and Payrolls in Agricultural Labor,* also published quarterly by the Department of Employment. Current data on the civilian labor force, civilian employment and unemployment are published monthly in *Employment and Unemployment in California,* issued jointly by the Department of Industrial Relations and the Department of Employment. The Department of Industrial Relations, Division of Labor Statistics and Research, publishes monthly data on nonagricultural employment, average hours worked and average earnings in the *California Labor Statistics Bulletin;* monthly work injury statistics in *Work Injuries in California* and a detailed annual summary in *California Work Injuries;* annual union membership data in *Union Labor in California;* annual data on work stoppages in *Work Stoppages in California;* and information about collective bargaining practices and other industrial relations data in *California Industrial Relations Reports,* issued three or four times a year.

Labor force. The labor force represents the sum of civilian employment and unemployment as defined in the following paragraphs. Caution is urged in comparing the statistics of employment and unemployment contained in this section with those published by the United States Department of Labor. The figures are not strictly comparable because of differences in methods of collection as well as in definitions and concepts.

Total civilian employment. Representing an overall figure of total employment, civilian employment covers the estimated number of employees in nonagricultural establishments, as defined below, plus estimates of employers, own-account workers, unpaid family workers, domestic workers, and agricultural workers.

Nonagricultural employment. The statistics of nonagricultural employment are prepared by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics, and are comparable with national estimates prepared by the United States Bureau of Labor Statistics and with State and area estimates prepared by other states. Excluded are domestic workers, employers, own-account workers, and unpaid family workers as well as agricultural workers. Government employment refers to civilian employees only.

The estimates cover all full- and part-time wage and salary workers (administrative, supervisory, sales, technical, and office personnel, and production workers) who worked during, or received pay for, any part of the pay period which includes the 12th of the month. Persons on an establishment payroll who are on paid holidays, paid sick leave, or paid vacations, or who work during a part of a specified pay period and are unemployed or on strike during the other part of the period are considered employed. Persons on the payroll of more than one establishment during the pay period are counted each time reported. On the other hand, persons who are laid off or are on leave without pay, who are on strike for the entire pay period, or who are hired but do not report to work during the pay period are not considered employed. Data for federal defense establishments generally refer to persons who worked on, or received pay for, the last day of the month; for federal nondefense establishments and state and local government, data relate to persons who received pay for any part of the pay period which includes the 12th of the month.

Agricultural employment. Estimates of employment in agriculture—including farmers, wage and salary workers, unpaid family workers, and foreign contract workers—are prepared by the California Department of Employment.

Other employment. Estimates of the number of employers, own-account workers, and unpaid family workers in nonagricultural industries and of domestic workers are prepared by the Department of Industrial Relations, Division of Labor Statistics and Research, based upon data derived from the U. S. Census of Population and upon various current series such as the number of sales tax permits, number of business and professional licenses, and other available information.

Unemployment. Estimates of unemployment are prepared by the California Department of Employment.

The term unemployment, as used in this series, means all persons who are in the labor market but who for the seven days in a given week have not done any work for pay or profit. To be counted as unemployed a person must be able to work, available for work, and looking for work.

The definition used is broadly comparable with that of the United States Bureau of the Census.

The estimates of unemployment represent the number unemployed during the week which includes the 12th of the month.

Components used in preparing estimates of total unemployment are (a) certified unemployment measured by weeks of unemployment insurance claimed under the California Unemployment Insurance Code minus partial and part-total weeks claimed, (b) estimated number of persons who have exhausted these benefits and remain unemployed, (c) estimated number of unemployed persons who could file for unemployment insurance compensation but do not file or delay filing a claim, (d) unemployed railroad workers as reported by the Railroad Retirement Board, (e) certified unemployment of federal workers covered under the provisions of the Unemployment Compensation for Federal Employees Act of 1954, (f) estimated unemployment among persons normally employed in industries not covered by unemployment insurance, such as agriculture, State and local government, domestic service, and most nonprofit institutions, and (g) estimated unemployment among recent entrants and re-entrants to the labor force and among the self-employed.

Unemployment rate. The unemployment rate represents the number of unemployed as a percent of the civilian labor force, i.e., the sum of the employed and the unemployed. The *seasonally adjusted unemployment rate* eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, regular industry model changeover periods, and the like, and, therefore, more clearly shows the underlying basic trend of unemployment.

Labor turnover. The Department of Employment develops and publishes labor turnover rates for manufacturing industries for the State and for the Los Angeles-Long Beach metropolitan area.

Labor turnover data, which represent the gross movement of wage and salary workers into and out of employment status with respect to individual establishments, are collected from a sample of 2,500 California establishments engaged in manufacturing. The sample covers approximately 60 percent of all manufacturing employment.

Labor turnover information is divided into two broad types: accessions (new hires and rehires), and separations (terminations of employment initiated by either employer or employees). Each type of action is cumulated for a calendar month and expressed as a rate per 100 employees.

Earnings and hours. The Division of Labor Statistics and Research compiles statistics of earnings and hours in all manufacturing and selected nonmanufacturing industry groups in California as a whole and in the thirteen major metropolitan areas of the State. These statistics of average weekly earnings, hourly earnings, and hours per week are derived from employment, payroll, and hours information reported by a representative sample of establishments in each industry group.

The averages are based upon data for full- and part-time workers who worked during or received pay for any part of the reported pay period in a given month (usually the week which includes the 12th of the month). Included in average earnings are overtime pay and premium wages for late shift work. Therefore, these data are not wage rates but are averages of gross earnings.

Work injuries. The work injury statistics are based upon reports of on-the-job injuries to workers employed in industries covered by the California Workmen's Compensation Act. These reports are filed with the Division of Labor Statistics and Research in compliance with provisions of the California Labor Code. Not covered by the California Workmen's Compensation Act are maritime workers, federal employees, and railroad workers in interstate commerce.

The number of fatal work injuries includes (1) deaths for which findings and award decisions are issued by the Workmen's Compensation Appeals Board; (2) deaths for which liability is accepted by the insurance carrier or self-insurer without Appeals Board determinations; (3) deaths for which compromise and release agreements are approved by the Appeals Board in which the sole issue is dependency; and (4) deaths for which the amount of compromise settlement either equals or exceeds the commuted value of a findings and award. All other deaths for which compromise and release settlements are approved are excluded from the work fatality statistics.

The statistics of insured payroll and workmen's compensation benefits are compiled by the California Inspection Rating Bureau, and are on a policy-year basis. The figures do not include the experience of self-insured private and government employers.

The statistics of payrolls and compensation benefits paid by private self-insurers are derived from annual reports submitted to the Manager, Self-Insurance Plans, Department of Industrial Relations. The compensation benefits include amounts paid in the designated calendar year for injuries sustained in the current year and continuing benefits for injuries which occurred in previous years. These figures are not strictly comparable with the statistics of incurred losses contained in Table C-23.

Union membership. California union membership figures are collected by the Division of Labor Statistics and Research by means of the annual Organized Labor Questionnaire.

All unions affiliated with the AFL-CIO or predecessor organizations are included in the membership survey. Unions not affiliated with the AFL-CIO are included if they are known to have written collective bargaining agreements with two or more different employers. Also included are unaffiliated unions with a written collective bargaining agreement with a single employer if the contract covers the employer's operations in more than one location in California and if the union has 1,000 or more members. Unions of government workers, which do not usually execute written collective bargaining agreements, are included if affiliated with the AFL-CIO. An unaffiliated union of government employees is included only if it has members in other states as well as in California.

Work stoppages. The statistics of work stoppages in California are collected by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics.

[a] Includes the employed and the unemployed available for work and seeking work.
[b] Includes wage and salary workers, employers, own-account workers, and unpaid family workers.
[c] Detail may not add to total because of rounding.
[d] Includes construction contractors and operative builders and their employees; does not include force-account and government construction workers.
[e] Excludes operative builders and their employees.
[f] Includes all civilian employees of federal, state, and local governments regardless of the activity in which the employee is engaged.

n.a. Not available.

Department of Industrial Relations
Division of Labor Statistics and Research

Department of Employment
Research and Statistics

Included are all known strikes and lockouts involving as few as six workers and lasting the equivalent of a full shift or longer. For statistical purposes a strike is defined as a temporary stoppage of work by a group of employees to express a grievance or to enforce a demand; a lockout is a temporary withholding of work from a group of employees by an employer (or group of employers) in order to induce them to accept the employer's terms. Each concerted action is counted as one stoppage, irrespective of the number of unions, employers, or establishments.

The number of *workers involved* includes all employees in establishments directly involved in a stoppage who are idle for a full shift or longer. Employees in other establishments who are unable to work because of material or service shortages, or for other reasons indirectly connected with the stoppage, are not counted among workers involved. The same worker can be counted more than once in the annual total if he is involved in more than one stoppage during the year.

The number of *mandays idle* is obtained by multiplying the number of workers involved in a stoppage by the number of days or shifts they would normally have worked had there been no stoppage. Allowances are made for fluctuations in the number of workers involved during the period of the stoppage.

[a] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of agricultural labor; interstate railroad employment; self-employed; Federal, State, and local government employment; domestic services in private homes; persons in the employ of certain nonprofit charitable, education, or religious organizations; persons in the employ of a son, daughter, or spouse; children under 21 employed by a parent; and certain other small groups of workers. Workers in exempt employment may be insured under provisions of the Code if the employer becomes a subject employer through elective coverage.

[b] Includes operative builders.

[c] Excludes operative builders.

[d] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to totals due to rounding.

[a] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of interstate railroad employment; self-employed; Federal, State, and local government employment; domestic services in private homes; persons in the employ of certain nonprofit charitable, education or religious organizations; persons in the employ of a son, daughter, or spouse; children under 21 employed by a parent; and certain other small groups of workers. Workers in exempt employment may be insured under provisions of the Code if the employe becomes a subject employer through elective coverage.

[b] Preliminary.

[c] Includes "Operative builders."

[d] Excludes "Operative builders."

[e] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to total due to rounding.

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.
Detail may not add to total because of rounding.
[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.
[d] Excludes employees of operative builders.
[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

[a] Employment and unemployment may not add to labor force because of trade disputes and rounding. Persons involved in trade disputes are included in the labor force, but are excluded from employment and unemployment.

[b] January–June 1968 data based on a three months average of February, April and June. Information not currently available for other months of the period. For comparability, January–June 1967 averages are computed on the same basis.

TABLE C-15

AVERAGE HOURS AND EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING, BY INDUSTRY, METROPOLITAN AREAS, 1967 [a]

Metropolitan area and industry	Average weekly hours	Average weekly earnings	Average hourly earnings
Los Angeles-Long Beach			
Total manufacturing	40.8	$131.78	$3.23
Total nondurable goods	38.9	117.48	3.02
Food and kindred products	39.7	133.79	3.37
Fish canning and preserving	35.7	91.04	2.55
Meat products	41.7	145.53	3.49
Dairy products	41.0	154.16	3.76
Fruit and vegetable canning and preserving	40.5	115.43	2.85
Grain mill products	46.5	139.04	2.99
Bakery products	37.5	139.13	3.71
Beverage industries	40.5	164.84	4.07
Textile mill products	41.2	98.88	2.40
Apparel and other fabricated textile products	37.0	79.55	2.15
Men's and boys' furnishings, work and sport garments	35.8	74.11	2.07
Women's and misses' outerwear	36.8	83.17	2.26
Women's and children's undergarments	38.0	70.30	1.85
Paper and allied products	41.1	129.88	3.16
Converted paper and paperboard products, except containers and boxes	40.5	121.50	3.00
Paperboard containers and boxes	41.6	132.29	3.18
Printing, publishing, and allied industries	35.5	139.87	3.94
Newspapers	32.8	146.94	4.48
Chemicals and allied products	41.1	132.34	3.22
Industrial chemicals	42.5	151.30	3.56
Plastics materials and other synthetic materials except glass	42.5	142.38	3.35
Drugs	40.8	114.65	2.81
Paints, varnishes and allied products	41.2	135.96	3.30
Petroleum refining and related industries	42.5	156.85	3.69
Petroleum refining	42.3	156.09	3.69
Rubber and miscellaneous plastics products	41.9	128.21	3.06
Miscellaneous fabricated rubber products	41.4	106.40	2.57
Miscellaneous plastics products	40.0	94.80	2.37
Leather and leather products	37.5	80.25	2.14
Total durable goods	41.6	137.70	3.31
Lumber and wood products, except furniture	39.3	117.90	3.00
Millwork, veneer, plywood, and prefabricated structural wood products	38.8	128.43	3.31
Furniture and fixtures	39.3	116.72	2.97
Household furniture	38.3	112.60	2.94
Stone, clay, and glass products	40.6	125.86	3.10
Structural clay products	40.2	111.76	2.78
Pottery and related products	38.3	93.07	2.43
Concrete, gypsum, and plaster products	41.0	160.31	3.91
Primary metal industries	42.7	136.64	3.20
Iron and steel foundries	40.3	116.87	2.90
Rolling, drawing and extruding—nonferrous metals	44.6	140.49	3.15
Nonferrous foundries	41.2	114.54	2.78
Fabricated metal products, except ordnance, machinery, and transportation equipment	42.2	133.77	3.17
Cutlery, hand tools, and general hardware	42.0	118.02	2.81
Heating apparatus (except electrical) and plumbing fixtures	39.6	111.28	2.81
Fabricated structural metal products	40.8	141.58	3.47
Screw machine products, and bolts, nuts, screws, rivets and washers	45.8	141.52	3.09
Metal stampings	42.1	133.46	3.17
Coating, engraving, and allied services	40.6	105.56	2.60
Miscellaneous fabricated wire products	41.1	120.42	2.93
Los Angeles-Long Beach—Continued			
Machinery, except electrical	43.2	$140.40	$3.25
Construction, mining, and materials handling machinery and equipment	41.7	139.70	3.35
Metalworking machinery and equipment	46.1	162.27	3.52
General industrial machinery and equipment	43.1	137.49	3.19
Office, computing, and accounting machines	42.0	125.16	2.98
Electrical machinery, equipment, and supplies	40.6	131.95	3.25
Electrical industrial apparatus	41.3	119.77	2.90
Household appliances	39.9	125.29	3.14
Electric lighting and wiring equipment	40.0	109.60	2.74
Communication equipment	41.2	158.21	3.84
Electronic components and accessories	39.6	93.85	2.37
Transportation equipment	42.0	149.94	3.57
Motor vehicles and equipment	38.1	131.45	3.45
Aircraft and parts	42.9	154.87	3.61
Ship and boat building and repairing	38.9	149.38	3.84
Instruments and related products	42.0	126.42	3.01
Mechanical measuring and controlling instruments	41.1	120.01	2.92
Miscellaneous manufacturing industries	39.8	96.71	2.43
Toys, amusement, sporting and athletic goods	39.4	86.29	2.19
San Francisco-Oakland			
Total manufacturing	39.3	140.30	3.57
Total nondurable goods	39.0	138.45	3.55
Food and kindred products	39.8	136.51	3.43
Fruit and vegetable canning and preserving	40.1	121.10	3.02
Bakery products	37.3	133.16	3.57
Confectionery and related products	38.9	105.42	2.71
Beverage industries	38.9	155.21	3.99
Textile mill products	40.4	113.52	2.81
Apparel and other fabricated textile products	35.4	83.19	2.35
Men's and boys' furnishings, work and sport garments	35.8	70.17	1.96
Women's and misses' outerwear	34.3	84.04	2.45
Paper and allied products	40.7	133.09	3.27
Converted paper and paperboard products, except containers and boxes	40.4	127.66	3.16
Paperboard containers and boxes	40.1	129.52	3.23
Printing, publishing, and allied industries	35.7	162.08	4.54
Chemicals and allied products	40.8	145.66	3.57
Industrial chemicals	41.3	152.40	3.69
Paints, varnishes, and allied products	40.7	141.23	3.47
Petroleum refining and related industries	42.6	161.45	3.79
Rubber and miscellaneous plastics products	39.4	118.20	3.00
Leather and leather products	40.4	123.22	3.05
Total durable goods	39.6	141.77	3.58
Lumber and wood products, except furniture	37.8	127.01	3.36
Furniture and fixtures	38.0	126.54	3.33
Household furniture	37.8	120.20	3.18
Stone, clay, and glass products	40.5	151.88	3.75
Primary metal industries	39.4	143.42	3.64
Iron and steel foundries	39.0	130.26	3.34
Fabricated metal products, except ordnance, machinery, and transportation equipment	39.4	143.42	3.64
Fabricated structural metal products	37.3	142.11	3.81

[a] Averages are based upon data for full-time and part-time production and related workers in production and other departments, such as shipping, maintenance, and warehousing. Average weekly hours include overtime hours. Overtime hours are hours in excess of regular hours and for which overtime premiums are paid. Average gross hourly earnings include overtime pay and premium wages for late-shift work. Hourly earnings, excluding overtime, are derived on the assumption that overtime hours are paid at the rate of time and one-half.

1966	136.80	117.80	107.70	101.90	93.17
1967	140.30	120.40	108.94	101.18	91.55

[a] Based upon data for full-time and part-time production and related workers. Overtime pay and premium wages for late-shift work are included.

[b] After Federal and State income taxes and old-age and disability insurance deductions.

[c] Net spendable earnings adjusted for changes in the Consumer Price Index. The Consumer Price Index is compiled by the U. S. Bureau of Labor Statistics for the Los Angeles-Long Beach and the San Francisco-Oakland metropolitan areas. The index for California is a weighted average of these two areas.

[a] Excludes experience of self-insured employers. There were approximately 350 self-insured employers in 1965.

[b] "Policy year basis": Losses originating under policies effective in a given year are assigned to that year regardless of accident date.

[c] Losses incurred are estimated ultimate loss costs and include not only the amount paid as of the valuation date, but also include estimated amounts to be paid in the future. Detail may not add to total because of rounding.

TABLE C-28

UNION MEMBERS IN CALIFORNIA BY ECONOMIC AREA JULY 1966 AND JULY 1967

Area	Number of members	
	July 1966	July 1967
Total	1,947,400	1,990,600
North Coast	15,000	14,300
Sacramento Valley	83,000	78,900
Mountain	36,600	35,400
San Francisco Bay (9 counties)	610,400	622,100
San Francisco-Oakland (5 counties)	*480,600*	*494,200*
Santa Clara County	*94,900*	*93,100*
Napa and Solano counties	*20,500*	*20,900*
Central Coast	31,300	34,400
San Joaquin Valley	117,900	122,500
Santa Barbara and Ventura counties	37,000	35,300
Los Angeles County	774,000	800,700
Orange County	85,900	86,100
San Diego County	78,600	82,800
Imperial, Riverside and San Bernardino counties	77,700	78,100

Counties included in each area
North Coast—Del Norte, Humboldt, Lake, and Mendocino.
Sacramento Valley—Butte, Colusa, Glenn, Sacramento, Sutter, Tehama, Yolo, and Yuba.
Mountain—Alpine, Amador, Calaveras, El Dorado, Inyo, Lassen, Mariposa, Modoc, Mono, Nevada, Placer, Plumas, Shasta, Sierra, Siskiyou, Trinity, and Tuolumne.
San Francisco Bay—Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma.
San Francisco-Oakland—Alameda, Contra Costa, Marin, San Francisco, and San Mateo.
Central Coast—Monterey, San Benito, San Luis Obispo, and Santa Cruz.
San Joaquin Valley—Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare.

TABLE C-29

WORK STOPPAGES, WORKERS INVOLVED, AND MANDAYS IDLE, CALIFORNIA, 1950–67

Year	Work stoppages beginning in year		Mandays idle during year	
	Number	Workers involved	Number[a]	Percent of estimated available working time[b]
1950	238	138,000	1,630,000	0.24
1951	217	98,500	1,210,000	0.16
1952	217	234,000	4,410,000	0.56
1953	269	210,000	2,960,000	0.36
1954	206	88,100	1,070,000	0.13
1955	247	157,000	1,760,000	0.20
1956	217	92,700	1,220,000	0.13
1957	235	104,000	1,570,000	0.16
1958	221	73,100	1,130,000	0.12
1959	260	102,000	3,340,000	0.34
1960	292	104,000	855,000	0.08
1961	269	99,100	1,110,000	0.09
1962	263	143,000	2,660,000	0.25
1963	276	60,200	1,340,000	0.12
1964	266	92,400	1,910,000	0.16
1965	341	150,000	2,340,000	0.20
1966	274	84,300	1,070,000	0.09
1967	300	146,000	2,070,000	0.16

[a] Includes idleness for all stoppages active in the year including those that began in the previous year.
[b] "Estimated available working time" is calculated by multiplying average nonfarm employment in private industry during the year in California by an estimate, used for the same purpose by the Bureau of Labor Statistics, U. S. Department of Labor, of mandays worked annually by most workers.

Department of Industrial Relations
Division of Labor Statistics and Research

[a] Based on annual reports received from general employment agencies; does not include transactions of theatrical and motion picture agencies, artists' managers, labor contractors, and nurses' registries.
[b] Permanent placements are those lasting more than 90 days; temporary placements are those lasting 90 days or less.
[c] Figures may not add to totals due to rounding.
[d] These figures are not strictly comparable with subsequent years because only applicant paid fees and placements were included. Figures beginning in 1957 include both applicant and employer paid fees and placements.

PLACEMENTS MADE BY PRIVATE EMPLOYMENT AGENCIES LICENSED BY THE DIVISION OF LABOR LAW ENFORCEMENT [a] BY FIELD OF EMPLOYMENT, CALIFORNIA, 1966

Field of employment	Total	Permanent [b]	Temporary [b]
Total	560,595	166,352	394,243
Commercial [c]	119,088	107,517	11,571
Baby sitting [d]	321,697	170	321,527
Domestic [e]	25,577	10,135	15,442
Hotel and restaurant [f]	15,089	11,583	3,506
Nursing and medical [g]	23,277	4,732	18,545
Technical and teaching [h]	6,000	5,395	605
Miscellaneous [i]	49,867	26,820	23,047

[a] Based on annual reports received from general employment agencies; does not include transactions of theatrical and motion picture agencies, artists' managers, labor contractors, and nurses' registries.
[b] Permanent placements are those lasting more than 90 days; temporary placements are those lasting 90 days or less.
[c] Includes office, sales, advertising employees, and kindred workers.
[d] Includes workers taking care of children in private homes without accompanying domestic duties.
[e] Includes household help, except baby sitters.
[f] Includes workers in hotels, bars, restaurants, bakeries, and lunch counters, and kindred workers, not including office employees.
[g] Includes all medically trained persons, including laboratory technicians, except private duty nurses who are placed by agencies licensed as nurses' registries.
[h] Includes public and private school teachers, laboratory technicians, lawyers, engineers, architects, and other professional workers, except medical.
[i] Includes others not classified above such as factory workers, beauty operators, models, etc.

Research and Statistics

SECTION D.

INCOME AND COST-OF-LIVING

This section presents data on business and personal income and the consumer price index.

Business Income

Tables D-1 to D-3 are compiled from corporate income data reported on returns filed with the Franchise Tax Board.

Corporations doing business in California and those having income from California sources but not technically doing business here are subject to the Bank and Corporation Tax Law. Chapter 2 of the law imposes the bank and corporation franchise tax and Chapter 3 the corporation income tax.

The bank and corporation franchise tax is imposed for the privilege of doing business in California and is according to or measured by the amount of net income earned in or allocable to the State in the preceding fiscal or calendar year. A corporation conducting a unitary business both within and without the State applies an allocation factor to its income in order to determine the amount subject to state taxation. The standard allocation formula is the arithmetic average of three factors—the ratio of California sales to total sales, the ratio of California payrolls to total payrolls, and the ratio of California property to total property. For the period 1935-1958, the basic bank and corporation franchise tax rate was 4 percent and the minimum franchise tax $25 a year. For 1959 and subsequent years, the rate was set at 5½ percent and the minimum tax, with limited exceptions, was increased to $100. Banks are exempt from paying the minimum tax.

The corporation income tax applies to corporations that derive income from California sources but do not engage in intrastate business in California. The corporation income tax rate is also 5½ percent (4 percent for 1958 and earlier income years) but there is no minimum tax. Data for these corporations have been omitted from Tables D-1 to D-3. For 1966, they numbered only 1,707, reported $31,148,154 net income taxable in California, and paid $1,905,645 in corporation income taxes.

Returns for fiscal years ending within a calendar year are included with returns for that calendar year.

Personal Income

Estimates of personal income received by residents of each state are prepared annually by the National Income Division, Office of Business Economics, in the United States Department of Commerce. Data are available, by years and types of income, back to 1929 in *Personal Income By States*. Totals and details for the most recent years are reported in the August issue of the *Survey of Current Business*. Quarterly estimates of personal income in California, at annual rates, comparable to the United States Department of Commerce series, are prepared by the Budget Division of the State Department of Finance. Mimeographed reports of this information are available upon request.

An understanding of the conceptual basis of income estimates is essential to the use of these data and it is hoped that users interested in sources of basic information, estimating techniques, definitions, and limitations of these data will consult the Department of Commerce reports mentioned above. Particular note should be taken of the facts that income (1) represents receipts before payment of income taxes and certain non-tax charges, and (2) includes nonmonetary income, such as imputed net rental values of owner-occupied homes and payments in kind as well as in cash. As defined, residents include individuals, nonprofit institutions, private trusts, and private pension, health and welfare funds. Nonprofit institutions include religious organizations, clubs, labor organizations, nonprofit schools and hospitals, charitable, welfare, and other private nonprofit agencies furnishing services to individuals.

Briefly stated, the following are encompassed in the six categories of income shown here:

Wage and salary disbursements. Monetary remuneration of employees, including commissions, tips, bonuses, etc., and payments in kind.

Other labor income. Employer contributions under private pension, health, welfare and group insurance plans, compensation for injuries, pay of military reservists, directors' fees, etc.

Proprietors' income. Net business earnings of owners of unincorporated enterprises, including farmers and such professional practitioners as doctors, dentists, and lawyers.

Property income. Rental income of persons (including royalties on patents, copyrights, and rights to natural resources and imputed net rents), personal interest incomes (including certain imputations), and cash dividends.

Transfer payments. Receipts from government and business for which no service is rendered currently: pensions, unemployment benefits, disability benefits, medicare benefits, direct relief, bad debts absorbed by business establishments, corporate gifts to private nonprofit institutions, etc.

Personal contributions for social insurance. Employee contributions for old age and survivors insurance, unemployment insurance, medicare and public employee retirement systems. Includes similar contributions for such purposes by self-employed individuals. Personal contributions for social insurance are deducted in estimating personal income, since wage and salary disbursements are reported including amounts withheld by employers for this purpose.

The source report shows total and per capita incomes by types and major sources in greater detail than is shown in this *Abstract,* industrial sources of personal income, total and per capita disposable income (after direct personal taxes and certain nontax payments) and ratios which cannot be reproduced here for reasons of space.

Personal income tax data. Personal income tax returns are required of single persons with gross incomes of $5,000 or more or adjusted gross incomes of $2,000 or more and of married persons with gross incomes of $5,000 or more or adjusted gross incomes of $4,000 or more. For the period 1959–63, the filing requirement was based on net income of $1,500 for single persons and unmarried heads of households and $3,000 for married persons. Prior to 1959, the net income amounts were $2,000 for single persons and unmarried heads of households aud $3,500 for married persons.

Personal income tax tables are classified by adjusted gross income class intervals. Adjusted gross income includes salaries and wages (less certain unreimbursed expenses incurred in connection with employment), dividends, interest, annuities, a percentage of net gains or net losses from the sale or exchange of capital assets, gains or losses from the sale or exchange of property other than capital assets, rents and royalties less expenses attributable thereto, gross receipts from business less costs of goods sold and business expenses, and distributive shares of partnership gross income, alimony and separate maintenance payments, pensions, iucome from life insurance and endowment contracts, income from discharge of indebtedness, income in respect to a decedent, and income from interest in an estate or trust.

Sampling techniques have been used to derive most of the data appearing in the tables presenting the number of personal income tax returns and the amount of adjusted gross income.

It is evident, of course, that much of the personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing state returns or is exempt from state taxation (e.g., dividends on veterans' government insurance, federal and state social security benefits, railroad retiremeut benefits, workmen's compensation for personal injuries or sickness, interest on federal bonds, etc.). Conversely, there are items of taxable income which are not included in the personal income concept such as gains from sales of assets and alimony. Hence, the data on taxable income are not strictly comparable to those on personal income.

Prices

Tables D-11 aud D-12 present the Consumer Price Index for the Los Angeles-Long Beach Metropolitan Area (Los Angeles and Orange counties), the San Francisco-Oakland Metropolitan Area (Alameda, Contra Costa, Marin, San Francisco, San Mateo and Solano counties), California, and the United States.

The index measures the average change in prices of goods and services usually bought by urban wage earners and clerical workers, both families and single persons living alone.

The indices for Los Angeles-Long Beach, San Francisco-Oakland and the United States are those compiled by the United States Bureau of Labor Statistics. The index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indices. The weights used are proportional to the populations of the Los Angeles and San Francisco areas.

Current figures for Pacific Coast areas are published regularly by the Regional Office, United States Bureau of Labor Statistics, San Francisco.

Comparisons of indices for individual areas show only that prices in one location changed more or less than in another. These indices cannot be used to measure differences in price levels or in living costs between areas.

TABLE D-1

CORPORATE TAX RETURNS, STATE NET INCOME, AND TAX ASSESSED, CALIFORNIA, 1950–66 [a]

Income year	Number of returns	Net income reported for state taxation	Tax assessed [b]
1950	21,987	$2,431,894,545	$105,117,408

1963	66,496	5,091,922,000	304,613,490
1964	69,555	5,525,955,803	326,880,193
1965	71,484	6,007,206,947	352,892,460
1966	73,076	6,637,754,510	385,212,963

[a] Includes bank and corporation franchise tax returns received through November of the succeeding year. Returns for a given income year include those for the calendar year and fiscal years ended therein (i.e. 1966 includes January 31, 1966 through December 31, 1966 accounting periods). Excludes corporation income tax returns.

[b] Includes the basic bank and corporation franchise tax (5½% of net income) and the bank and financial tax (maximum of 4% of net income) imposed under the provisions of Section 23186A of the Bank and Corporation Tax Law.

Franchise Tax Board

[a] Includes bank and corporation franchise tax returns received through November of the succeeding year. Returns for a given income year include those for the calendar year and fiscal years ended therein (i.e. 1966 includes January 31, 1966 through December 31, 1966 accounting periods). Excludes corporation income tax returns.
[b] As allocated to State for tax purposes.
[c] Detail may not add to total because of rounding.

SECTION E.

HEALTH AND WELFARE

Compiled under this broad heading are tables relating to vital statistics and other public health; mental hygiene; crime, criminal justice and delinquency; and social insurance.

Vital Statistics and Other Public Health

This section presents selected statistics relating to public health in California, prepared by the State Department of Public Health.

The sources of data for public health statistics and reports are registration and reporting systems established by law, voluntary reporting systems established with local health agencies, and surveys and special studies conducted or sponsored by the Department.

Tables E-1–E-5: Data on births, deaths, marriages, divorces and annulments. In interpreting these statistics, certain limitations must be recognized. Crude rates for vital events are influenced by age and sex distributions within the population. Also, the comparability of cause of death data is affected by increasing medical knowledge, changes in classifying disease categories, and changes in international rules for selecting the underlying cause of death.

For interpretation of statistics relating to vital events, the following definitions should be noted:

Residence. A person's residence is his usual place of abode. Birth tables by residence refer to the place where the child's mother usually lives. Deaths in institutions are allocated to the inmate's previous residence regardless of length of stay in institution.

Occurrence. The place of occurrence is where the event actually occurred. California residents taking part in marriages, divorces and annulments in other states are not enumerated in Table E-3.

Live Birth. Live birth is the complete expulsion or extraction from its mother of a product of conception (irrespective of the duration of pregnancy) which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. A fetal death is required to be registered if the 20th week of gestation has been reached.

Table E-6: Data on selected notifiable diseases. Notification to the local health authority that a case of communicable disease exists within the particular jurisdiction is the first step towards control. These morbidity data are limited by the incompleteness of reporting, the changes made in specific diseases which shall be reported, and by the nature of the incidence of certain diseases in cyclical patterns.

Tables E-7 and E-8: Licensed facilities and beds. The Department of Public Health licenses hospitals, nursing homes and related health facilities to insure that standards of patient care are met. The Hospital Advisory Board conducts public hearings and makes recommendations on standards.

More detailed statistical information is published annually in the California Public Health Statistical Report and other series. These and other public health data from program activities, special studies and research projects are available from the Division of Research, Health Surveillance Unit, Department of Public Health, 2151 Berkeley Way, Berkeley, California.

Crime, Criminal Justice and Delinquency

This section presents summary tables showing the number and procedural movement of persons under commitment to the two State correctional agencies, the Departments of Corrections and Youth Authority.

Data relating to the Department of Corrections were compiled starting with 1945, and those for the Youth Authority with 1946, the years in which central statistical controls were established. Figures for years not included here were published in the 1966 *California Statistical Abstract.*

No data are presented on crimes committed, persons arrested, or the procedures of criminal justice. These data, to be meaningful, must be given in more detail, and require more explanation and qualification than would be appropriate in this volume. The interested reader is referred to the publications of the Bureau of Criminal Statistics, Department of Justice, for such data. *Crime and Delinquency in California* presents data on felony crimes, felony arrests, and juvenile arrests, as reported by sheriffs and police, and on the procedures and results of prosecution in the superior courts, as reported by district attorneys. The Justice publication also presents data on the characteristics of, and procedures applied to (1) juveniles referred to county probation departments, (2) persons referred by superior and juvenile courts to the Youth Authority and, (3) convicted persons referred by superior courts to their respective probation officers. *California Prisoners,* published by California Department of Corrections, describes the characteristics and movement through prison and parole of adult persons convicted of felonies and committed to the Department of Corrections.

The Annual *Statistical Report* published by the California Youth Authority summarizes the facts about the referrals to that Department, characteristics of wards first committed, ward population movement and data on parole performance.

In the Department of Corrections, the California Rehabilitation Center was established by 1961 legislative action. This Center, opened September 15, 1961, is for the confinement and treatment of narcotic addicts civilly committed to the Department under Penal Code Chapter 11 and Welfare and Institutions

Code 3000 et seq. The Department of Corrections has a new publication, *Summary Statistics, Civil Commitment Program for Narcotic Addicts,* which presents data on this program.

Social Insurance and Welfare

This section presents data relating to State programs providing unemployment and disability insurance, Federal programs administered in California to provide unemployment compensation to veterans and former federal employees and Old-Age, Survivors, and Disability Insurance benefits; federal, state and county programs assisting the aged, the blind, the disabled, and needy children, providing medical care for public assistance recipients and medical assistance for the needy; county programs of general relief; and the state, county and private agency program providing adoption services. There are several principal sources for these data. Current statistics relative to operations are available in the monthly report to the Governor prepared by the Department of Employment and in monthly reports prepared by the Department of Social Welfare. Data on public assistance expenditures and recipients are regularly reported in *Public Welfare in California,* issued monthly by the Department of Social Welfare. Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data on medical care recipients and expenditures were published monthly through February 1966 by the Department of Social Welfare in *Public Assistance Medical Care and Medical Assistance for the Aged, Services and Expenditure Report.* With the inception of the California Medical Assistance Program beginning March 1, 1966, medical care reporting has been assumed by the Office of Health Care Services. The data are presently published quarterly in *California Medical Assistance Program, Services and Expenditures Report.* Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data for California Medical Assistance Program are based on claims paid by the fiscal intermediaries and data received from the State Department of Mental Hygiene. Data on adoption services are based on reports to the Department of Social Welfare by the Department's area offices, and by county welfare departments and private adoption agencies.

Employment Security. Unemployment insurance and disability insurance activities are reported here from 1950 on. Legislation has modified the coverage, benefits, and services under these programs from time to time, and many uses of the data will require reference to the statutory changes. A detailed description of all changes which substantially affect the figures given here has been published by the Department of Employment under the title, *Summary of Major Changes in Program of Department of Employment, 1935–1965.*

Old Age Security. Statistics under this caption relate to financial assistance to persons 65 years of age or over who do not have sufficient financial resources to support themselves. Within limitations, recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, the ceiling on income producing real property is $5,000 assessed valuation and $1,200 net value on real and personal property held as a reserve. There is no limitation on the value of any real or personal property used as a home. The recipient must have been a resident of California for one year immediately preceding application plus four of the last nine years.

Aid to the Blind. The data relate to financial assistance for blind persons in need who cannot support themselves.

Recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, income-producing property must be producing income reasonably related to its value and the ceiling on real and personal property held as a reserve is $1,500 net value. There is no limitation on the value of any real or personal property used as a home. A recipient with an approved plan for self-support may own additional property for not longer than 36 months if the property will further his self-support plan. The recipient must be at least 16 years of age and be a resident of California.

Aid to Potentially Self-supporting Blind. These figures describe financial assistance and medical care for persons who, because of blindness, are unable to support themselves, but are working on a plan for self-support.

Within limitations, recipients may own real property and keep additional real or personal property for future needs and own additional property if the property will further his self-support plan. Age and residence requirements are the same as those for Aid to the Blind.

Aid to Families with Dependent Children. The data relate to financial assistance for children under 21 years of age who are in need because of the death, continuous absence, incapacity, or unemployment of a parent. (The program was amended, effective February 1, 1964, to include children in need because of unemployment of a parent.) In general, the ceilings in financial resources are $600 value of personal property, less certain encumbrances, and $5,000 assessed valuation of real property, less encumbrances of record. Unless the child was born in California, he or his parent(s) must have resided in California for at least one year before application. Assistance is available for children living in foster homes as well as for children living with a parent(s) or relatives.

Aid to Needy Disabled. Figures under this heading relate to financial assistance and medical care for needy persons who have a major physical or mental impairment or a combination of both that is likely to continue without substantial improvement throughout their lifetime and which substantially precludes them from engaging in useful occupations within their competence, such as holding a job or homemaking. To be eligible, a person must be at least 18 years of age, and a) have lived in California at least three years

of the nine preceding application (one of which must be the year preceding application) or b) have become disabled while a resident of the state. Property qualifications are the same as in Old Age Security.

Medical Assistance for the Aged. This program, which began January 1, 1962, provided payments for care in hospitals and nursing homes and outpatient after-care, to persons 65 years of age and over who are not recipients of Old Age Security and who are unable to pay for this care from their own funds. The data show the number of inpatient and outpatient certificate holders in benefit status, total and average payments by type of care, and source of funds. The MAA program was abolished when the California Medical Assistance Program became effective March 1, 1966. Persons receiving medical care under MAA were transferred to the new program.

Public Assistance Medical Care (PAMC). This program, which began October 1957, provided payments for medical care, (chiefly outpatient care), for recipients of categorical aid. The scope of benefits varied according to the category of aid. PAMC data are shown as part of the statistics for each categorical aid program. The PAMC program was also terminated with the advent of the California Medical Assistance Program on March 1, 1966. Under the new program, uniform comprehensive medical coverage is available to all aid recipients. In addition, inpatient care and outpatient after-care are available to those medically needy persons and families who meet categorical aid requirements, except for income.

General Relief. Data on this subject relate to assistance to needy persons not eligible under state subvented assistance programs listed above. It is administered and financed entirely by counties. Eligibility requirements and standards of assistance vary from county to county.

Adoptions. Services provided by this program include studies of the suitability of adoptive homes, suitability of children for adoption, and recommendations to the courts on granting of adoption petitions. When a child is placed in an adoptive home by an adoption agency (county or private), it is termed a "relinquishment" adoption; when the child is placed directly by the parent, it is termed an "independent" adoption.

California Medical Assistance Program. On March 1, 1966, California's new Medical Assistance Program replaced Public Assistance Medical Care and Medical Assistance for the Aged.

All recipients of public assistance (OAS, AFDC, AB, APSB, and ATD) are automatically eligible for Medical Assistance.

Persons, similar to cash grant recipients in the categorical aid programs, who lack sufficient income for their medical care are covered as medically needy. County welfare departments determine the eligibility of medically needy applicants and the extent of their liability (if any) for paying a share of the cost of their medical care.

The benefits for public assistance recipients include comprehensive in-patient care (hospital and nursing home) and out-patient care, e.g., physicians services, drugs, dental services, laboratory and X-ray. Similar, but limited, benefits are provided the medically needy.

The county welfare departments determine eligibility for medical assistance and certify the persons eligible to the California Physicians' Service or Blue Cross. These organizations, acting as fiscal intermediaries for the State, examine and pay the bills.

Mental Hygiene

Statistics on mental hygiene, included in the *Statistical Abstract* for earlier years, have been dropped from the 1968 edition. Changes in the concept of patient movement make present data not comparable with previously reported years. The Bureau of Biostatistics of the Department of Mental Hygiene is working on new tables for inclusion in the 1969 *Abstract.*

TABLE E-1

LIVE BIRTHS, MARRIAGES, DIVORCES AND DEATHS CALIFORNIA, 1950–67

Year	Live births[a]		Marriages[b]		Divorces[c]		Deaths[a]

1967	336,584	17.2	150,000	7.7	62,985	3.2	156,592	8.0

[a] By place of residence.
[b] By place of occurrence.
[c] By county granting decree.
[d] Rates are per 1,000 population estimated as of July 1. The 1950 and 1960 populations are those enumerated as of April 1.

NOTE: In September, 1965, the one-year waiting period for final decrees, which formerly commenced when the interlocutory decree was granted, was changed to begin at the time the initial complaint was filed.

[a] 1967 county populations were estimated from information provided by Department of Finance, Department of Education, and the California Taxpayers' Association.

[b] Rates are based on age groups of 10–20 for total commitments; 10–17 for juvenile court commitments; and 18–20 for criminal court commitments. Rates are omitted for counties with less than 10,000 population in the 10–20 year age group.

Net increase during year	122	67	608	616	−120	−159	44	121

[a] Includes all wards placed by Youth Authority in State and local institutions.

[b] Beginning in 1957, wards on furlough were considered part of the resident population; movements to and from furlough are therefore not shown as population movements. Starting again in 1962 the wards on furlough were not considered as part of the resident population.

[c] Parole guests in institutions are included in "Other" figures prior to 1965.

[a] Public Assistance Medical Care (PAMC) program was in effect for the period October 1957 through February 1966, and the current California Medical Assistance Program (CMAP) became effective March 1966. Medical care costs shown represent expenditures made under these programs for the given time periods. However, medical care cost data available for Aid to the Blind program are limited to expenditures made under the PAMC program for the period July–February 1966; these amounted to $1,666,690 (Federal = $420,402; State = $1,210,303; County = $35,985). CMAP costs for March–June 1966 and fiscal year ending June 30, 1967 are available only as combined totals for AB and APSB programs (see footnote [c]).

[b] Based on recipients eligible for Public Assistance Medical Care.

[c] Medical care costs under California Medical Assistance Program are available only as combined totals for Aid to the Blind and Aid to Potentially Self-supporting Blind programs. During March–June 1966, this combined total amounted to $1,326,761; during fiscal year ending June 30, 1967, the combined total amounted to $7,384,123 (also see footnote [a]).

[a] Public Assistance Medical Care (PAMC) program was in effect for the period October 1957 through February 1966, and the current California Medical Assistance Program (CMAP) became effective March 1966. Medical care costs shown represent expenditures made under these programs for the given time periods. However, medical care cost data available for Aid to the Potentially Self-supporting Blind program are limited to expenditures made under the PAMC program for the period July–February 1966; these amounted to $4,970 (State = $4,776; County = $184). CMAP costs for March–June 1966 and fiscal year ending June 30, 1967 are available only as combined totals for AB and APSB programs (see footnote [c]).

[b] Based on recipients eligible for Public Assistance Medical Care.

[c] Medical care costs under California Medical Assistance Program are available only as combined totals for Aid to the Blind and Aid to Potentially Self-supporting Blind programs. During March–June 1966, this combined total amounted to $1,325,761; during fiscal year ending June 30, 1967, the combined total amounted to $7,384,123 (also see footnote [a]).

n.a. Not available.

[a] General Home Relief is that form of General Relief given to persons in their home to meet one or more of the basic subsistence items of food, shelter, or clothing. The definition of GHR includes residents who are residing in the county. It does not include transients since they are by definition persons who are not residing in the county.

[b] Usual low month.

[c] Usual high month.

[a] Includes supplemental aid from county funds.

[b] Public Assistance Medical Care (PAMC) program was in effect for the period October 1957 through February 1966, and the current California Medical Assistance Program (CMAP) became effective March 1966. Medical care costs shown represent expenditures made under these programs for the given time periods. However, medical care cost data available for Aid to Families with Dependent Children, Boarding Homes and Institutions, are limited to expenditures made under the PAMC program for the period July–February 1966; these amounted to a total, all being state costs, of $648,631. CMAP costs for March–June 1966 and fiscal year ending June 30, 1967 are available only as combined totals for families receiving AFDC and AFDC children in foster home care (see footnote [e]).

[c] Federal participation effective April 1, 1963.

[d] Based on recipients eligible for Public Assistance Medical Care.

[e] Medical care costs under California Medical Assistance Program are available only as combined totals for families receiving AFDC and AFDC children in foster home care. During March–June 1966, this combined total amounted to $15,359,504; during fiscal year ending June 30, 1967, the combined total amounted to $150,214,110 (also see footnote [e]).

[a] Includes AFDC—Family Group component and after February 1, 1964 the Unemployed component.

[b] Includes supplemental aid from county funds.

[c] Public Assistance Medical Care program was in effect for the period October 1957 through February 1966, and the current California Medical Assistance Program (CMAP) became effective March 1966. Medical care costs shown represent expenditures made under these programs for the given time periods. However, medical care cost data available for Aid to Families with Dependent Children program are limited to expenditures made under the PAMC program for the period July–Februnry 1966; these amounted to $11,988,447 (Federal = $7,819,539; State = $4,168,908). CMAP costs for March–June 1966 nnd fiscnl yenr ending June 30, 1967 nre nvnilnble only ns combined totnls for fnmilies receiving AFDC and AFDC children in foster home cnre (see footnote [e]).

[d] Based on recipients eligible for Public Assistance Medical Care.

[e] Medical cnre costs under Californin Medical Assistnnce Progrnm nre nvnilnble only ns combined totnls for fnmilies receiving AFDC nnd AFDC children in foster home cnre. During March–June 1966, this combined total nmounted to $15,359,504; during fiscnl year ending June 30, 1967, the combined total amounted to $150,214,110 (also see footnote [c]).

n.a. Not nvnilnble.

[a] Persons or families whose monthly income is in excess of the basic maintenance base, but is not sufficient to provide for the cost of health care, and who otherwise meet eligibility requirements for one of the categorical assistance programs. Also included are persons or families who are defined as Public Assistance recipients but do not receive a cash grant because of one of the following reasons: lack of required residence in the state; eligible for public assistance grant but not wishing to receive one; under 21 in AFDC families for whom cash aid is not given currently because of age; children living in foster care homes or institutions whose needs are met in whole or part by public funds.

[a] Benefit payments being made at a given time with no deductions or with deductions amounting to less than a month's benefit. Not precisely equivalent to number of beneficiaries because prior to 1956, some persons received more than one check.

[b] Benefit amounts represent January payments.

[c] Includes old-age, wife's or husband's, widow's or widower's, and parent's benefits.

[d] Data as of February 1959; December 1958 data not published because of heavy workload due to legislative changes.

SECTION F.

EDUCATION

This section presents data complied by the Bureau of Administrative Research and District Organization of the California State Department of Education relative to public school enrollment, apportionment, certificated personnel, and current expenditures for public school education. Higher education data relate to all public and independent colleges.

Actual enrollment. This term describes the number of pupils registered at a specific period during the school year. Enrollment information is collected once in the fall and again in the spring. The data given here are enrollments as of the fourth week of the fall semester. The K-14 enrollment indicates kindergarten through grade fourteen; K-8, kindergarten through grade eight; high school enrollment includes grades nine through twelve; and junior college, grades thirteen and fourteen. Special enrollment, or enrollment in special classes, is defined by footnotes.

Detailed information on actual enrollments by individual grades by county, on each classification included in the special enrollments and on the number of pupils on double sessions, is published annually by the State Department of Education.

Enrollments in higher education, by year and by individual institutions, are published by the Department of Finance, Budget Division.

Apportionment average daily attendance. This represents the average daily attendance used to apportion state school funds. For this purpose, the elementary average daily attendance includes kindergarten through grade eight, irrespective of the location of the grades. Accordingly, grades seven and eight in the junior high schools are included in the elementary level. The high school average daily atttendance includes grades nine through twelve, irrespective of location, and the junior college, grades thirteen and fourteen.

A detailed breakdown of the apportionment average daily attendance of individual districts and of county totals may be obtained from the annual publication of the State Department of Education entitled, "The State School Fund and Educational Statistics for the Fiscal Year ending June 30, 19__, Book 1."

Apportionment of state funds to public schools. These figures indicate the principal apportionment which includes both basic and equalization financial aid to each of the levels (elementary, high school, and junior college). The apportionment which is made to the county school service fund, i.e., the operation of the office of the County Superintendent of Schools also is included. Since the state apportionment to schools is now made on current data, average daily attendance and assessed valuation, the apportionment for growth has been eliminated. Special apportionments include reimbursements for transportation, driver education, and excess cost for the education of handicapped pupils. A detailed explanation of each of these funds and the legal basis for its allocation is furnished in the annual publication of the State Department of Education entitled, "The State School Fund and Educational Statistics for the Fiscal Year ending June 30, 19___, Book 2. . . ."

Current expenditures. The figures given here include total expenditures made by the school districts from (1) local funds, raised chiefly through property taxes, (2) the moneys apportioned to the districts by the State and, (3) Federal funds. These expenditures include only expenditures from the general fund of the school district, but do not include general fund expenditures for food services, community services and capital outlay. Special funds, such as building fund, bond interest and redemption, etc., are not included. Expenditures are presented in terms of district organization, i.e., the expenditures of the elementary districts, high school districts, junior college districts, and unified districts. The unified district column indicates the total expenditures for unified districts, including all levels which are encompassed by unified districts. In some instances this is kindergarten through grade twelve, and in other instances, kindergarten through fourteen. All of the expenditures of the unified districts are included in this column and are not indicated in the other column designations.

Full-time certificated personnel. This figure is the total number of full-time certificated personnel in the public schools, exclusive of substitute or other part-time teachers. The number of full-time certificated personnel in California public schools is available in "Salaries of Certificated Employees in California Public Schools," published annually by the Bureau of Administrative Research and District Organization.

ENROLLMENTS OF TOTAL AND FULL-TIME STUDENTS IN PUBLIC JUNIOR COLLEGES, STATE COLLEGES, UNIVERSITY OF CALIFORNIA, AND INDEPENDENT COLLEGES AND UNIVERSITIES, FALL 1956 TO 1967

Fall semester	Total	Public junior colleges		State colleges	University of California	Independent colleges and universities
		Legally defined adults [a]	Enrollment in grades 13 and 14 and specials			
Total enrollment:						
1956	399,216	125,786	114,923	62,785	40,313	55,409
1957	444,767	135,185	132,694	72,083	42,039	62,766
1958	495,767	154,242	147,941	81,030	43,478	69,076
1959	517,101	164,894	146,900	87,844	44,878	72,585
1960	561,032	188,485	151,564	95,081	49,162	76,740
1961	611,352	194,463	175,570	105,987	54,265	81,196
1962	664,518	204,818	197,828	118,057	58,616	85,199
1963	723,390	213,784	221,008	133,108	64,504	90,986
1964	790,945	224,323	249,178	149,016	71,267	97,161
1965	882,404	253,769	289,456	154,887	79,437	104,855
1966	934,600	271,014	299,893	169,520	87,033	107,140
1967	997,446	285,935	324,834	185,601	95,376	[b]105,700
Full-time enrollment:						
1956	192,338	--	74,082	38,338	37,522	42,396
1957	209,109	--	80,913	41,582	39,444	47,170
1958	227,095	--	91,425	44,679	41,166	49,825
1959	233,707	--	90,254	49,473	42,386	51,594
1960	257,301	--	99,783	56,480	46,801	54,237
1961	285,295	--	112,636	64,099	51,340	57,220
1962	310,307	--	121,796	71,502	55,775	61,234
1963	336,164	--	129,106	80,188	61,073	65,797
1964	382,872	--	153,380	92,471	67,042	69,979
1965	444,512	--	192,476	98,840	75,743	77,453
1966	475,244	--	201,548	110,274	83,212	80,210
1967	510,079	--	217,028	122,426	91,780	[b]78,845

[a] One who has attained his 21st birthday on or before September 1 and who has enrolled for fewer than 10 class hours. Also, all those in classes maintained in a state institution, jail, or road camp.

[b] Fewer institutions included than previously.

SECTION G.

RESOURCE INDUSTRIES

This section presents data relating to five of the basic resources of California: water, agriculture, forestry, fishing, and mining. The descriptive section below includes a brief summary of the series covered and sources for additional information.

Water

Tables G-1 to G-17 present summary information describing the uses to which land is put in California, the land area receiving water service, and the distribution of the available water supply of the State. Whenever possible, the information is given by hydrologic study areas, which have been outlined in the plate on page 102.

The following is a general statement describing water conditions throughout the State during the 1966–67 water year, adapted from the introduction to the Department of Water Resources' Bulletin No. 120-67, Water Conditions in California—Fall Report, October 1967.

Water Conditions in California, 1966–67. Not since 1938 has California's water supply been as plentiful as during the 1966–67 water year. There were strong indications of above normal supplies when heavy precipitation occurred in early December and again in late January. February was a dry month but a series of cool storms beginning in March and continuing through April brought heavy snows to the mountainous watersheds and assured California of an excellent water year. By May 1 records of snow water content began to fall as new highs were reported, primarily in central and southern Sierra watersheds. Additional storms and a period of low temperatures during May resulted in a month's delay in the beginning of the major snowmelt period. As summer weather patterns returned, the late snow retention posed a hazard because of both the great amount of water stored in the snowpack and the increasing probability of a continued warm period.

In late May and early June, peak snowmelt flows caused wide concern, resulting in the Governor's declaration of a flood emergency condition for the San Joaquin River system. Unprecedented measurements of the June 1 snowpack were made throughout the State. The water contents at many high elevation courses exceeded the normal seasonal maximums and confirmed that the snowpack in the San Joaquin Valley watersheds could cause new peak flows. By early July these peaks had occurred and water agencies, whose careful control of water releases from San Joaquin Valley reservoirs prevented widespread flooding, finally were able to turn their attention from water disposal to water use problems.

Statewide precipitation during the 1966–67 water year was about 130 percent of average. Only the Colorado Desert area was below average, receiving 80 percent of normal for the water year. The North Coastal area received about 110 percent of average and values in other areas ranged upward from this amount to a high of about 150 percent of average for the San Francisco Bay and Central Coastal areas.

Total water year runoff in major California watersheds was about 155 percent of normal. In the Central Valley, runoff ranged from 130 percent of normal in the Upper Sacramento River Basin to over 250 percent of normal in southern Sierra drainages. The greatest water year runoff in over 50 years was experienced in the Kaweah River (265 percent of normal), Tule River (295 percent of normal), and Kern River (245 percent of normal). With runoff reflecting the precipitation pattern over the State, the North Coastal area had a relatively low 125 percent of normal streamflow for the year. In the San Francisco Bay and Central Coastal areas, water year runoff was 205 percent of normal. The South Coastal area produced 195 percent of normal runoff, but local runoff provides a rather small increment of the area's total water requirement. The Colorado River Basin, Southern California water users' main source of supply, produced only 75 percent of its normal water year runoff.

Streamflow during the April through July snowmelt period of the 1966–67 water year generally followed the same percentage distribution as that for the total water year. However, it should be noted that the delayed melt of the season's record snowpack essentially extended the snowmelt period through the entire summer for central and southern Sierra basins. Runoff of major San Joaquin Valley streams, for example, was 195 percent of normal for the April–July period but was 225 percent of normal for the May–September period.

Water stored in major California reservoirs at the end of the water year amounted to more than 16,600,000 acre-feet, which is nearly 70 percent of their combined capacities, 130 percent of October 1 average, and over 4,200,000 acre-feet more than was stored one year ago. This also is the greatest carry-over storage of record, exceeding the previous high of October 1, 1965 by over 2,000,000 acre-feet. The combined storage in Lake Powell and Lake Mead on the Colorado River, the major source of imported supplies for Southern California, was 22,733,000 acre-feet, or about 200,000 acre-feet more than they held one year ago.

The abundant late season surface supplies diminished the need for ground water use and, consequently, ground water levels in most areas of the State were significantly higher than one year ago. The generally improved status of the ground water basins and the excellent carryover storage in surface reservoirs should preclude critical storages from occurring during the coming year in areas served by snowmelt streams.

Publications. Much information on water resources and utilization is available in the several publications of the Department of Water Resources quoted as sources for most of the tables included in this section. In addition, a large amount of specific information is included in reports of other general and special investigations by the Department. A price list of publications in print is available upon request to the Department of Water Resources.

Agriculture

Data presented in this section, with the exception of United States Census data, are official estimates of the United States and California Departments of Agriculture. Current estimates are available in greater detail in reports issued by the Bureau of Agricultural Statistics, which also contain more detailed statistics. Data for many agricultural commodities are available for varying numbers of years preceding those shown in the tables. Data for 1967 are preliminary estimates.

Minor crops for which estimates are not prepared are not included in the "all field crops," "all fruit and nut crops," "all bushberry crops" and "all vegetable crops" categories in the tables. Certain information for some items does not appear in the tables because estimates are not applicable or were not made for the specific crop. For example, cottonseed is harvested from the same acreage as cotton lint, therefore acreage estimates are not published for cottonseed. Another example is corn for forage, for which separate production and value data are not estimated.

Years designated. The years designated for crops are "crop years", not calendar years. Planting or blooming may have started in the preceding year and marketing may have extended into the following year. Price and value data for livestock and poultry products pertain to marketings in the year specified. Production data for livestock and poultry products are for calendar years.

Prices. Estimates of prices received by farmers generally represent composite averages of all grades, classes and methods of sale for the State as a whole. Prices of vegetables for fresh market represent the average paid for the packed products loaded at f.o.b. position. Prices of fruits and nuts are on the basis of naked fruit at growers' first delivery point.

Production of no value. Occasionally a portion of the production of a crop has no value. When this occurs, that portion without value is excluded from computations of average unit value and total value.

Forestry

Forestry is one of the most important enterprises in California and represents a significant proportion of such activities in the Nation. The State contains 42.5 million acres of forest land, ranking first in the United States. More than 17 million acres are capable of producing commercial forest crops. California has the second largest U.S. volume of standing timber.

About 16% of United States lumber production and substantial quantities of other wood products are manufactured in California. The State ranks third in timber cutting, third in lumber production, and third in plywood manufacture. In 1963 it was estimated that California ranked first in value of forest products sold and first in number employed in the timber industry with 108,000 employees. There are approximately 1400 timber operators, 300 sawmills, 49 veneer and plywood plants including 24 softwood producers, eight wood pulp mills, four particle board plants, one hardboard plant and many secondary wood using industries, e.g. planing mills, furniture, and paper, in California. It has been estimated that nearly 2.3 billion dollars was added to the economy in all timber-based economic activities in California in 1958. See Section H on manufacturing for statistics on employees and product value.

These industries are dependent upon a renewable resource—growing crops of trees—recognized as good business. Forests are vital to California also for watershed protection, recreation, and fish and wildlife.

More detailed data than that contained in the following tables are contained in *Forest Statistics for California* (Berkeley, 1954), *California's Timber Industries: Some Facts and Figures* (Berkeley, 1959), *A Century of Lumber Production in California and Nevada* (Berkeley, 1953) published by Pacific Southwest Forest and Range Experiment Station of U. S. Forest Service. See also *Production of California Timber Operators in 1966* (Sacramento, 1968) of California Division of Forestry and various U. S. Bureau of Census reports cited in the tables. Information concerning potential of woodpulp industry and waste disposal is found in *Waste Treatment and Disposal Aspects to Development of California's Pulp and Paper Industries* (Sacramento, 1957) published by State Water Quality Control Board.

The Economic Importance of Timber in the United States (Washington, D.C., 1963), published by the U. S. Forest Service, contains estimates of value added and employment for timber-based economic activities. *Economic Development Prospects for the Commercial Forest Resources and Forest Products Industries of California* (Berkeley, 1963), a Report to the State Office of Planning published by the University of California School of Forestry, contains much information on the forest resource and related industries including regional breakdowns of ownership, production, and resource data.

Timber Trends in the United States (Washington D.C., 1965), published by the U.S. Forest Service, contains numerous statistics on California's timber industries and in addition is an appraisal of the timber situation and outlook in the United States.

Fishing

This section presents statistics of quantity, value, species, and disposition of fish caught for commercial and recreational purposes.

Information relative to fisheries and the recreational use of wildlife is available from the Department of Fish and Game. Data are published regularly in the annual *Statistical Report of Fresh, Canned, Cured and Manufactured Fishery Products;* annually

in *The California Marine Fish Catch* (*Fish Bulletin* series); in the *Monthly Statewide Report of Receipts and Case Pack, Tuna and Other Species;* and in the monthly *Report of the California Party Boat Fleet* (sportcatch).

Mining

These tables present summary statistics of the quantity and value of mineral production in California, compiled by the Division of Mines and Geology and the Division of Oil and Gas, California Department of Conservation. Detailed county figures are available from these agencies.

The monthly publication, Mineral Information Service, provides information on geology and mineral resources of California, the usefulness of minerals and rocks. mineral discoveries and operations.

In addition, the Division of Mines and Geology issues mineral bulletins, special geologic reports, county mineral reports, geologic and mineral maps. The most recent edition of Mineral Resources of California was released in 1966 as Bulletin 191. It gives information on the geologic occurrence, economic development, and utilization of the State's mineral resources; price $2.

Detailed statistics on petroleum and natural gas production are published by the Division of Oil and Gas in the semiannual Summary of Operations, California Oil Fields, and the monthly Oil and Gas Production Report, both free.

Statistics of mineral operations in California will also be found in the reports of the U. S. Bureau of Mines and the Census. The latest census was conducted for 1963.

TABLE G-1

TOTAL ACREAGE AND ACREAGE RECEIVING WATER SERVICE,[a] BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1960

(In thousands)

Hydrologic Study Area	Total acreage	Acreage receiving water service	
		Gross irrigated[b]	Urban and suburban[c]
Total	100,500	8,550	2,068
North Coastal	11,390	270	44
San Francisco Bay	3,650	170	443
Central Coastal	7,220	390	80
South Coastal	7,000	505	998
Sacramento Basin	16,600	1,490	178
Delta-Central Sierra	3,200	750	47
San Joaquin Basin	6,990	1,220	64
Tulare Basin	11,060	2,870	149
North Lahontan	3,790	130	4
South Lahontan	17,180	95	25
Colorado Desert	12,420	660	36

[a] Based on land and water use surveys conducted by the Department of Water Resources, indicative of 1960 level of development.
[b] Includes farm lots and minor included acreages not receiving water service, such as roads, railroads, rights of way and other nonagricultural parcels of land.
[c] Estimated from population and density data.

TABLE G-5

AGGREGATE GROSS CAPACITIES OF RESERVOIRS IN CALIFORNIA,[a] BY HYDROGRAPHIC AREA[b]
January 1, 1968
(In acre-feet)

Hydrographic area	Aggregate capacity[c]
Total	38,349,879
North Coastal[d]	3,945,342
San Francisco Bay[d]	893,010
Central Coastal	1,329,400
South Coastal	2,352,596
Central Valley	27,275,919
Sacramento Basin	*16,177,413*
San Joaquin-Tulare Lake Basin[e]	*11,098,506*
Lahontan	1,722,587
Colorado Desert[f]	831,025

[a] All reservoirs in California with gross capacities of 1,000 acre-feet or more. Includes reservoirs constructed by federal and state agencies, as well as those constructed by local agencies, concerns and persons. Excludes capacities of reservoirs to be inundated by new construction.
[b] Hydrographic Areas correspond essentially to Hydrologic Study Areas, except as indicated in footnotes "d" and "e," below. North and South Lahontan combined.
[c] Totals include reservoirs under construction.
[d] Reservoirs of Russian River Basin and Salmon Creek Group (the latter tributary to Bodega and Tomales Bays) included in North Coastal total.
[e] Includes Delta-Central Sierra Hydrologic Study Area.
[f] Includes Parker Reservoir on Colorado River.

[a] Selected streams, generally indicative of water supply. All runoff data preliminary, subject to revision.
[b] Measured flow, adjusted for upstream storage, diversions, and imports.
[c] Snowmelt period; indicates adequacy of water supplies.
[d] Period generally between successive annual low flows.
[e] 1910–11 through 1959–60; estimates for stations having shorter records obtained by correlating with nearby long-term stations.
[f] Nonsnowmelt stream.
[g] Measured flow, not adjusted for upstream regulation.
[h] Including Delta tributaries.
[i] Adjusted for regulation of Upper Colorado Storage Project Reservoirs.

TABLE G-8

WATER QUALITY DATA
SELECTED GROUND WATER BASINS, CALIFORNIA, 1965

Ground water basin	No. wells sampled, 1965[a]	Total dissolved solids (mg/l)[b]			Total hardness[c] (mg/l)		
		Max.	Min.	Median	Max.	Min.	Median
Smith River Plain	10	173	50	134	122	23	75
Sacramento Valley	199	2,970	118	313	1,260	11	151
San Joaquin Valley	486	6,400	45	350	3,900	6	160
West Coast Basin (Los Angeles Co.)	272	[d]41,397	254	1,985	8,482	9	256
Chino Basin (San Bernardino County)	97	1,417	132	305	782	13	200
Coachella Valley	17	1,080	140	420	269	18	170

[a] Some of the indicated wells are sampled more than once during the year. In this table, each of these wells is represented by only one analysis.
[b] Milligrams per liter, equivalent to parts per million.
[c] Expressed as calcium carbonate in milligrams per liter. In general, hardness above 200 mg/l requires softening for domestic use.
[d] Excessive mineral concentrations caused by sea water intrusion.

Department of Water Resources

TABLE G-9

ESTIMATED ANNUAL REQUIREMENTS FOR WATER, BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1960

(In thousand acre-feet)

Hydrologic study area	Type of water service	
	Irrigation	Urban and suburban
Total	28,480	3,260
North Coastal	420	20
San Francisco Bay	330	590
Central Coastal	660	110
South Coastal	1,080	1,640
Sacramento Basin	5,900	250
Delta-Central Sierra	2,960	100
San Joaquin Basin	4,620	130
Tulare Basin	7,600	300
North Lahontan	400	10
South Lahontan	410	50
Colorado Desert	4,100	60

Note: Water requirements listed here correspond to acreages receiving water service, as shown in Table G-1. Footnotes [a] and [b] of that table apply to this table as well. Urban and suburban requirements are based on population and per capita use data.

Sacramento	1	16,494	18,272	21,701	23,587	23,171
Fresno	1	18,277	19,280	19,516	20,722	18,976
Susanville[e]	6	523	486	531	470	585
Bishop	1	462	445	464	409	322
El Centro	1	1,652	1,514	1,628	1,762	1,870

[a] Gross water supplies or net water deliveries.
[b] Fiscal year—July 1 to June 30 of successive calendar years.
[c] Within city limits.
[d] Metered consumption within area normally served.
[e] Quantities for calendar year (first year indicated in each column heading).
[f] Total deliveries of Colorado River water. Includes part of water supply for Long Beach, Los Angeles, and San Diego, listed above.

Buena Vista	Kern River	Kern	Kern County Land Company	1890	Earth	12	205,000	Stor.	Irr.

EXPLANATORY NOTE: This list of 91 major dams in California includes only those which are over 190 feet high or have reservoirs of at least 100,000 acre-feet capacity. There are more than 1,000 dams within the safety jurisdiction of the State, which is exercised over dams which are 25 feet or more high, storing more than 15 acre-feet of water, or, which are more than 6 feet high storing at least 50 acre-feet. Federally operated dams, 21 of which are listed here, are exempt from State safety supervision.

The "height" listed is the vertical distance from the crest of the dam to the original streambed at the downstream toe of the dam.

[a] List of abbreviations:
USBR—United States Bureau of Reclamation
CDWR—California Department of Water Resources
USCE—United States Corps of Engineers
MCFC&WCD—Monterey County Flood Control & Water Conservation District
PG&E—Pacific Gas and Electric Company
SCVWCD—Santa Clara Valley Water Conservation District
LACFCD—Los Angeles County Flood Control District
MWD—Metropolitan Water District of Southern California
ID—In name of builder refers to Irrigation District
EBMUD—East Bay Municipal Utility District
SMUD—Sacramento Municipal Utility District

[b] List of abbreviations (Purpose of dam):
Mult. purp.—Multiple purpose
Stor.—Storage
Div.—Diversion
Reg.—Regulation
Fl. cont.—Flood control
Deb. cont.—Debris control

[c] List of abbreviations (Use of water):
Irr.—Irrigation
Pwr.—Power
Rec.—Recreation
Mun.—Municipal
Dom.—Domestic
Ind.—Industrial

[a] Includes entire acreage of farms where only a part was irrigated.
[b] Exceeds land area because entire acreage of a farm is tabulated as in the county in which the farm headquarters is located, even though a part of the farm may be located in an adjoining county.

[a] Cleaned basis, yield in pounds, production in cwt.
[b] Yield in pounds net lint; production in 500 pounds gross weight bales; price on cwt. basis.
[c] Produced on the same acreage as estimated for cotton lint.
[d] Yield in pounds.
[e] Price on a hundredweight basis.
[f] Related to year of harvest. It also includes some acreage carried over and harvested the following spring. Prices do not include Government payments under the Sugar Act. 1967 price and value are based on U. S. average price.

SECTION H.

MANUFACTURING

This section presents data on manufacturing industries summarized from the U.S. Census of Manufactures and the annual surveys conducted by the United States Department of Commerce, Bureau of the Census. Detailed information for individual industries and local areas is available in the published reports of the Bureau of the Census.

Except for 1958 and 1963, the statistics are based on sample surveys. In 1958 and 1963 complete censuses were taken.

Definitions

All employees—Includes all full-time and part-time employees on the payroll of the operating establishment. For 1959-62, all employees represent the average number of production workers employed for the payroll period ended nearest the 15th of March, May, August, and November plus all other employees for the payroll period ended nearest the 15th of March. For 1958 and for 1963, it represents an average of reported employment totals for the payroll period ended nearest the 15th of March, May, August, and November. The figures include data for central administrative offices and auxiliary establishments.

Payroll—Includes all forms of compensation (salaries, wages, commissions, bonuses, vacation pay, and other remuneration) paid during the year to all employees of the establishment. Payroll is reported before deductions for Social Security, income tax, group insurance, union dues, etc.

Production workers—Includes workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

Wages—Consists of that portion of the payroll paid to production workers.

Value added by manufacture—Derived by subtracting the cost of raw materials, parts and components, supplies, fuels, purchased electricity, goods purchased for resale, and contract work from the value of shipments of manufacturing establishments in each industry and adjusting for the net change in finished goods and work-in-process inventory between the beginning and end of the year plus the value added in merchandising activities of manufacturing establishments.

New capital expenditures—Includes, for all manufacturing plants in operation and under construction: expenditures for new structures and additions (including major alterations, capitalized repairs, and improvements) to the manufacturing plant, whether on contract or by the plant's own work force; new machinery and new equipment; and capitalized repairs and improvements to existing machinery and equipment. Excluded from the new expenditures total are those expenditures for "used" plant and equipment acquired from others, and expenditures for land.

SECTION I.

DEFENSE-AEROSPACE

Information on California's largest single manufacturing sector, defense-aerospace, is obtained primarily from reports of the U.S. Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the California Department of Industrial Relations. Material from these and other sources has been summarized by the Department of Finance, Budget Division.

Table I-1 summarizes all DOD prime awards for procurement actions of $10,000 or more, and includes those for research and development (R&D), shown separately in Table I-2. NASA totals include awards of $10,000 or more for R&D and to educational and nonprofit institutions, and of $25,000 or more for all other contracts.

Prime contract awards are given to the manufacturer who will assume primary responsibility for coordination, testing, production or similar activities related to a project. The primary contractor, in turn, generally sub-contracts to other firms approximately half the initial award. These subcontracts may or may not be made to other firms in the state of the primary contractor. Adequate information is not available by which to determine the overall position of California firms in DOD and NASA primary and subcontracting.

The information on scientists was gathered by the National Science Foundation through a mail questionnaire, sent to members of 12 scientific societies cooperating with the Foundation. Persons belonging to these societies have been classified as scientists and have been included in the National Register of Scientific and Technical Personnel. Of the 1966 respondents, 37 percent reported a doctorate as the highest degree, 28 percent had a master's degree and 30 percent held a bachelor's degree. Because of the substantial number of nonrespondents and incomplete coverage of the scientist population, the data on scientists should not be regarded as the total number of persons in the professional activities listed.

SECTION J.

CONSTRUCTION

This section presents annual statistics on California building permits issued for housing units and various types of other construction. These statistics are compiled by the Bureau of the Census, U.S. Department of Commerce. Two sets of building permit data are currently reported by the Bureau of the Census. One set is based on approximately 12,000 permit issuing places known in the United States; the other set relates to 3,014 selected permit-issuing places in which permits were issued for at least 50 housing units during 1959. In 1966 these selected places accounted for 84 percent of all housing units authorized in the United States.

Because various data in the 3,014-place series are reported more frequently, in greater detail, and are regularly published in the *Construction Review*, the detailed data on value of permits included in the tables that follow are based on these series. For California these data series are obtained from 245 of approximately 400 permit offices in the State, and in 1966 represented about 92.5 percent of the housing units authorized in the State. The number of residential units shown for metropolitan areas in Table J-5 is based on the 12,000 permit-issuing place series.

Current monthly data on new residential construction authorized in permit-issuing places for the United States, California and local areas are given in various construction reports, published by the Bureau of the Census. Detailed description of building permit data is available in the 1965 summary statistics of the Bureau's publication: *Housing Authorized in Permit-Issuing Places* (C-42-65-13).

Private new nonresidential construction data for California has been prepared from special tabulations furnished by the Bureau of the Census, Construction Statistics Division.

TABLE J-1

CALIFORNIA BUILDING PERMIT ACTIVITY: VALUATION BY TYPE OF BUILDING CONSTRUCTION, 1962–67

(In millions)

Type of building construction	1962	1963	1964	1965	1966	1967
All building construction	$4,320.2	$5,074.9	$4,834.6	$4,390.7	$3,451.4	$3,547.5

SECTION K.

TRANSPORTATION

Statistics relating to the mileage of roads, expenditures to construct and maintain these roads, gallons of fuel used, and traffic and accident data on all freeways and on rural State highways are maintained and were compiled for publication by the Urban Planning Department of the Division of Highways, Department of Public Works.

The Highway Planning Survey inventoried all roads outside the incorporated areas during the period 1949-55. The counties are required to maintain the inventory of the roads under their jurisdiction and report changes in mileage in May of each year.

The accident statistics contained in this report are based upon fatal and injury accidents involving a motor vehicle. The reports from which these statistics are compiled are those required to be reported to the California Highway Patrol under Section 20008 of the Vehicle Code. Accidents involving "property damage only" are not required to be reported and, consequently, do not reflect an accurate total.

In addition to the accident data contained in this report for 1966, the Department of California Highway Patrol also received an additional 3,887 reports of motor vehicle accidents which occurred on private property. These accidents resulted in death for 185 persons and injury to 4,618 persons.

World Trade Statistics

The dollar value of foreign trade, as compiled by the United States Department of Commerce, is presented for the three customs districts: Los Angeles, San Diego, and San Francisco.

Leading exports are: food and live animals, with fruit and dried milk playing an important role; crude materials, with raw cotton the number one export; chemicals, including inorganic and hydrocarbons; and machinery and transportation equipment, including non-electrical machine appliances.

Leading imports are: food products, half of which is green coffee; mineral fuels, mostly petroleum; manufactured goods, including newsprint and iron and steel plate; and machinery and transportation equipment, including automobiles and telecommunication equipment. Textile clothing is also becoming an important import.

The statistics on tonnage of inbound and outbound oceanborne cargo were compiled from U.S. Dept. of Commerce publications.

Other information sources on California world trade and shipping are the Los Angeles World Trade Center Authority, the San Francisco World Trade Center Authority, and the San Francisco Port Authority. All are State of California agencies.

TABLE K-1

STATE HIGHWAY MILEAGE,[a] BY SURFACE TYPE, DECEMBER 31, 1967

Surface type	Total	Outside cities	Inside cities
Total	16,500	14,046	2,454

Motorcycles	106,341	150,259	204,296	264,655	310,072	357,230

[a] Estimated California total population at the end of each calendar year. Financial and Population Research Section, Department of Finance.
[b] Vehicles publicly and privately owned not subject to license fees.
[c] 1962 renewal totals are somewhat inflated as a result of increased early renewals in 1962 due to the issuance of new vehicle license plates for the 1963 registration year.
[d] 1967 totals are estimates of actual registrations with the effect of early renewal removed.

Out-of-state [e]	124,780	----	52,500	26,200	41,710	2,690	1,680

[a] Registration figures for 1967 are estimates of actual registration with the effect of early renewal removed.
[b] Sum of parts may not equal total because of independent rounding.
[c] Estimated California total population at the end of each calendar year from Financial and Population Research Section, Department of Finance.
[d] Values not rounded due to small number of registrations.
[e] Figures in this category represent vehicles registered in California by people whose permanent address of residence is in a state other than California.

1967	176,518	39,219	94,199	32,032	11,068

[a] Formal action placing the driver on notice of the imminence of suspension or revocation upon continued violation.
[b] Temporary withdrawal of the driving privilege with the surrender during the term of suspension of all licenses. At the end of the suspension the license is returned.
[c] Person's driving privilege is terminated and all licenses issued must be surrendered. The revocation is for an indefinite period and must be ended by the Department, at which time the applicant must apply for and be issued a new license before driving.
[d] License certificate is withdrawn without prejudice and must be surrendered. Any person whose license has been cancelled may immediately apply for a license.

TABLE K-22

FINANCIAL RESPONSIBILITY REPORTS RECEIVED, PERCENTAGE OF INSURED, SECURITY DEPOSITS, AND SUSPENSIONS EFFECTED 1950–67

Calendar year	Accident reports received	Percent insured drivers	Security deposits	License suspensions effected
1950	266,974	78.1	$571,509	28,238
1951	308,497	78.6	631,629	32,439
1952	333,870	80.2	722,888	33,901
1953	333,068	83.8	727,956	34,684
1954	336,508	84.2	670,053	32,161
1955	374,797	85.3	786,088	30,956
1956	450,071	87.3	856,298	36,745
1957	481,158	88.3	1,075,537	35,342
1958	472,633	88.2	965,028	35,337
1959	467,369	85.1	1,128,989	34,001
1960	535,643	88.1	1,347,228	35,618
1961	554,318	86.1	1,546,299	40,037
1962	605,286	88.4	2,094,548	45,118
1963	649,801	88.5	2,402,000	48,713
1964	702,346	89.4	2,818,031	49,948
1965	712,784	89.2	2,778,354	53,637
1966	725,649	89.0	3,058,682	67,751
1967[a]	753,600	88.1	3,052,904	114,000

[a] The 1967 license suspension effected figure is not comparable with prior year data. On November 1, 1966 a new procedure was instituted and the 1967 figure shows license suspension orders mailed rather than license suspensions effected.

SECTION L.

PUBLIC UTILITIES

This section presents statistics summarizing the operations of public utilities in California. Tables L-6 and L-7 cover telephones placed by Pacific Telephone and the Independent Telephone Companies. Tables L-8 to L-10 present typical monthly utility bills in selected California cities. More detailed data on any of the utilities can be obtained from the Public Utilities Commission.

TABLE L-1

1956	41,039	9,877	6,218	17,391	4,125	3,428							
1957	44,804	10,901	6,788	18,992	4,365	3,758	1966	97,003	25,417	63,711[e]		--	7,875
1958	46,559	11,812	7,085	19,985	3,722	3,955							
1959	52,488	12,682	7,689	22,514	5,196	4,407							

[a] Certain data, including all irrigation data, corrrected since publication of 1963 edition of California Statistical Abstract.

[b] Includes all rural use other than irrigation.

[c] Includes energy used for pumping by the U.S. Bureau of Reclamation for the Central Valley Project. For 1965 and 1966, irrigation pumping included in Commercial and Industrial class.

[d] Includes energy used by Metropolitan Water District of Southern California for pumping Colorado River water through its main aqueduct, as well as use by other public agencies, railroads and street railways, and by electric utilities for plant operation.

[e] Equivalent subdivision of commercial and industrial use not available.

NOTE: Total quantities shown in this table differ from those in Table L-1 for two reasons. In the first place, some of the energy used in California is generated outside the State (and vice versa). Second, and more important, transmission and distribution losses are not included in L-2.

Source: For years 1960–64, Federal Power Commission, Regional Office, San Francisco, records; records of agencies indicated in footnotes [c] and [d]. For 1965 and 1966, Edison Electric Institute Annual Statistical Bulletins, and records of Metropolitan Water District.

SECTION M.

TRADE AND SERVICES

This section presents information on wholesale and retail trade in California as these are reflected in the Census of Business and taxable sales data, and on services as reflected by census data and the licensing activities of the state agencies which examine and license professional and vocational personnel and establishments.

Tables M-1 through M-4, M-15 and M-17 summarize 1963 Census data on wholesale trade, retail trade, and selected services in California. Additional information is available from the final census reports for the State, issued by the U.S. Department of Commerce, Bureau of the Census.

Total wholesale trade figures include merchant wholesalers (also shown separately), manufacturers' sales branches, petroleum bulk terminals, merchandise agents and brokers, and assemblers of farm products. The merchant wholesaler group is by far the largest of these, accounting for 71.3 percent of all wholesaling establishments and 44.1 percent of all sales. Merchant wholesalers include all establishments primarily engaged in buying and selling merchandise on their own account.

Retail trade data cover all items sold through retail outlets or by nonstore retailers. The latter group includes mail-order houses, merchandise vending machine operators and direct (house-to-house) selling organizations. Retail trade figures from the 1963 Census therefore differ substantially from the taxable sales data, which exclude all items not subject to the California sales tax—notably food for home consumption and gasoline. The number of retail establishments is based on those in operation during November, 1963, and is lower than the number of taxable sales permits issued during the year. The latter category not only includes retail firms that have gone out of business during the year, but also manufacturers, wholesalers, and itinerant vendors making retail sales.

Service data include only major activities, which, however, account for most of the persons engaged in the service sector: hotels, motels, and tourist camps; personal services; miscellaneous business services; automobile and miscellaneous repair services; motion pictures; aud other amusement and recreation services. These activities are reported essentially in their entirety. Excluded are medical, legal, and educational services; museums, art galleries, and botanical and zoological gardens; nonprofit membership organizations; and private household and miscellaneous services.

Taxable sales data. Detailed statistics are given in tables M-6 through M-13 on the number of outlets and the amount of taxable transactions of establishments licensed by the State Board of Equalization to sell tangible personal property. For the State as a whole and for each of the eight most populous counties, data are shown for 40 classes of retail business and for three categories covering all licensed non-retail business. For 20 other counties and for 43 cities whose annual retail store sales in 1966 exceeded $100 million, data are shown in considerable detail. Totals for retail stores and for all permittees are shown for each county and city in the State.

In general, outlets are classified according to the seller's principal line of business, using the Standard Industrial Classification developed by the United States Bureau of the Budget. Certain types of business selling only merchandise not subject to sales tax are not licensed and, consequently, are not represented in the statistics. The principal exclusions are establishments selling only food for home consumption, such as produce markets, meat and seafood markets, poultry stores, dairy stores, bakeries, etc.

The machine tabulations that provide the basis for taxable transactions in the tables that follow are also the source for the data printed in the Trade Outlets and Taxable Retail Sales Reports published each quarter by the State Board of Equalization. As explained in the reports for the last two quarters of 1965, the tabulations were understated by $140 million in the third quarter and $237 million in the fourth quarter because of problems stemming from legislation that became effective on August 1, 1965. This legislation required taxpayers whose taxable transactions exceeded $17,000 in either the first or second month of a quarter to pay 90 percent of their state sales tax receipts for each such month on or before the 25th of the following month and to file their quarterly returns on or before the 25th of the month immediately following the end of the quarter.

Problems inherent in the prepayment program as originally adopted together with difficulties in obtaining taxpayer understanding and compliance prevented completion by required cutoff dates of paperwork necessary for machine processing of a sizable number of tax returns filed for the last two quarters of 1965. Consequently, a portion of the taxable sales data was excluded from the 1965 machine tabulations and resulted in an understatement of such sales printed in the tables of the Board's "Trade Outlet" reports for the final two quarters of 1965. In order to present an accurate picture of taxable transactions for 1965 in the tables in this publication, the tax returns excluded from the machine tabulations were manually tabulated and adjustments were made to correct the sales data *for each class of business* shown for the state as a whole and for each of the 43 cities whose taxable transactions exceeded $100 million in 1966. A lack of resources prevented similar detailed adjustments for counties or any of the smaller cities, but, nevertheless, the aggregate deficiencies for each of the

28 counties for which class of business data are printed are shown as unallocated amounts. Taxable transactions shown for each county in Table M-8 were also adjusted to correct any understatements of tabulated data.

The system used for clearing up unprocessed third- and fourth-quarter returns of 1965 caused 1966 first-quarter taxable transaction tabulations to include prior-quarter understatements. Consequently, the machine tabulations of 1966 first-quarter data were overstated by the same amount as the 1965 data were understated. The 1966 sales data for each class of business for the State as a whole and for the 43 largest cities were manually adjusted to the correct amounts. Furthermore, for each county for which class of business data are printed in Tables M-10 and M-11, an adjustment was made to the total taxable transaction figure by showing the overstatement as an unallocated amount.

The adjustments made to the taxable transaction data that are printed in this volume were described above in order to point out to users of the Board's quarterly Trade Outlets and Taxable Retail Sales Reports the reasons for discrepancies between the data in the two publications. With the exception of class of business detail for counties, the figures through 1966 printed in Tables M-6 through M-13 of this volume are correct.

A new set of problems adversely affecting the comparability of sales tax data occurred in the third quarter of 1967 when the State's sales tax rate was increased to four percent on August 1, for most but not all taxable transactions. These two factors gave rise to a situation that made it virtually impossible to continue the reporting system initiated in 1946. The adoption of a rate increase in mid-quarter created some reporting complications which again delayed the filing of returns and introduced some taxpayers' reporting errors which took time to resolve. Most important, however, was the fact that the tax rate increase did not apply to sales or purchases of materials and fixtures involved in fixed-price construction contracts signed prior to August 1, 1967. This change made it impossible to utilize state tax receipts for deriving taxable transactions. To overcome this dilemma it was necessary to utilize local sales and use tax payments as a basis for establishing taxable transactions. The local base unfortunately differs from the state base because certain transactions of common carriers, waterborne vessels, and public utilities subject to state sales tax are exempt from local tax.

To overcome the latter deficiency it was necessary to tabulate locally-exempt transactions manually by class of business and to supplement the local base accordingly. In the last six months of 1967 these exemptions totaled $313,337,500. Through this procedure it was possible to produce statewide taxable transactions by type of business that are fully comparable to figures previously published.

Ninety percent of the locally-exempt transactions identified were reported by multiple-outlet concerns which are not required to provide the detail that would permit the allocation of the exempt transactions to the appropriate local jurisdictions. In view of this situation, it was impossible to allocate the exempt amounts reported on the returns of these taxpayers to the appropriate counties or any of their cities. Accordingly, $288,585,000 of transactions by concerns claiming local use tax exemptions could not be allocated to the counties which would have received credit for such transactions if the state base had been utilized as the basis for compiling taxable transactions. This figure is included in the unallocated amount for 1967 in Table M-8.

Moreover, state tax payments from which taxable transactions were heretofore established have always been credited to the jurisdiction in which the taxpayer's place of business is located. The incidence of the local tax, however, may differ from that of the state tax. Insofar as certain taxpayers are concerned, primarily construction contractors and many suppliers who sell and install building materials, the incidence of the local sales tax occurs at the job site instead of at the taxpayer's place of business. To the extent that places of business of such taxpayers are not located in the same county as their job sites, the county data for 1967 are not comparable with those for prior years. Since most building materials and supplies are used by the contractor or installer in the same county in which his place of business is located, any lack of comparability of the county figures between 1967 and prior years will be rather small except for the $288,585,000 referred to in the preceding paragraph.

The taxable transactions of retail stores may not be the same as their gross receipts because not all of their transactions are subject to sales tax. The principal exemptions from the tax are the sales of (a) food for home consumption, (b) gasoline, which is subject to the motor vehicle fuel license tax, (c) utility services when delivered to consumers through mains, lines, or pipes, (d) animal life used for human consumption, (e) feed, seed, plants, and fertilizers when used for the production of food for humans, (f) newspapers and periodicals, and (g) prescription medicines. For a complete list of exemptions see Sections 6351 through 6422.1 of the Revenue and Taxation Code of California. Also not included in taxable transactions are service charges, a source of receipts of many retail stores and all service establishments.

The statistics include purchases of equipment, fixtures, supplies, and material from outside of the State on which use taxes are reported and paid by the purchasers.

The Board of Equalization publishes quarterly reports containing outlet and taxable sales data by type of business for the State as a whole, for 56 counties and for 168 of the largest cities of the State as determined by the dollar volume of taxable transactions reported by retail stores for the preceding calendar

year. It also publishes outlet and taxable sales data for retail stores and for all outlets for all California cities.

Licensed professional and vocational personnel and establishments. Statistics are presented giving the numbers of licensed professional and vocational personnel and the licensed establishments based on operating statistics of the Department of Professional and Vocational Standards. The growth of activity in the licensed professions and vocations can be inferred from the data presented, but it must be noted that no direct measure is available of the volume of professional and vocational services provided by the licensees.

TABLE M-6

NUMBER OF SALES TAX ACCOUNTS [a] AND OUTSTANDING PERMITS TO SELL TANGIBLE PERSONAL PROPERTY ISSUED UNDER THE CALIFORNIA SALES AND USE TAX LAW ON JULY 1, 1960–67

Year	Number of permits [b]	Number of accounts [b]
1960	346,706	324,584
1961	351,540	327,509
1962	355,403	332,215
1963	362,614	337,626
1964	372,387	345,471
1965	381,203	351,501
1966	389,867	357,719
1967	392,705	359,311

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.
[b] A firm usually has only one account regardless of the number of its outlets, but it has as many permits as it has outlets. Excludes holders of certificates of registration use tax.

[a] Sales or purchases made, with minor exceptions, during the calendar year.
[b] Taxable transactions for 1966 have been adjusted to correct the deficiencies and overstatements described in the introduction to this section.

Board of Equalization
Research and Statistics

[a] Self-assessed taxable sales reported by concerns doing business in California and self-assessed purchases of Californians subject to use tax. Does not include board-assessed sales, which over the period covered by the table ranged from $20,000,000 to $110,000,000 a quarter. Does not include sales of gasoline and other high-test motor vehicle fuel, sales of food for off-premises consumption, sales of water, electricity, and gas when delivered through pipes or wires, and other tax-exempt sales.
[b] Third- and fourth-quarter figures have been adjusted to correct the deficiencies described in the introduction to this section.
[c] First-quarter figures have been adjusted to correct the overstatements described in the introduction to this section.

Board of Equalization
Research and Statistics

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

[b] Sales or purchases made, with minor exceptions, during the calendar year.

Board of Equalization
Research and Statistics

[c] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[d] The 1966 sales data for each class of business have been adjusted to correct the deficiencies and overstatements described in the introduction to this section.

Unallocated	--	--	—22,275	--	--	--	—16,133	--

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[c] County totals have been adjusted, as indicated in the introduction to this section, to the correct amounts. The adjustments are shown as unallocated amounts because they could not be allocated to type of business.

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[c] County totals have been adjusted, as indicated in the introduction to this section, to the correct amounts. The adjustments are shown as unallocated amounts because they could not be allocated to type of business.

TABLE M-14

APPARENT CONSUMPTION [a] OF ALCOHOLIC BEVERAGES IN CALIFORNIA, BY TYPE OF BEVERAGE, 1950–67

(In thousands of gallons)

Year	Beer	Still wines		Sparkling wine	Distilled spirits
		14 percent alcohol or less	Over 14 percent alcohol		
1950	162,484	6,909	14,535	293	18,592
1951	168,226	7,140	12,958	290	18,773
1952	175,512	7,852	15,227	292	19,025
1953	182,269	8,532	16,900	350	19,708
1954	181,095	9,176	15,453	341	19,704
1955	185,740	10,008	15,848	463	20,953
1956	195,446	10,358	17,024	560	22,571
1957	203,349	10,575	16,978	619	23,010
1958	217,086	11,338	17,247	659	23,757
1959	230,439	11,983	17,687	804	26,019
1960	232,402	15,201	17,006	915	27,456
1961	238,306	16,435	17,828	996	29,243
1962	251,695	17,464	16,696	1,074	31,304
1963	265,779	19,441	16,646	1,204	32,509
1964	281,916	21,291	16,596	1,502	35,654
1965	290,277	23,134	16,379	1,730	37,261
1966	305,025	23,609	15,410	1,960	38,828
1967	313,438	26,117	14,996	2,228	40,127

[a] Except for tax-exempt distributions of beer to the armed forces which have been included in beer distributions, the figures in this table represent taxable distributions and are compiled from the monthly tax returns of the taxpayers. Because the tax liability attaches at the time alcoholic beverages are sold by manufacturers or importers rather than at the time a retail sale is made or when the consumption occurs, the above data are referred to as *apparent* consumption figures rather than as *actual* consumption figures.

SECTION N.

BANKING AND FINANCE

This section presents bank, savings and loan association, and insurance statistics.

The bank statistics were supplied by the State Superintendent of Banks. The savings and loan statistics were made available by the Federal Home Loan Bank of San Francisco. Additional data may be obtained from these sources.

The State Superintendent of Banks issues an annual report on the financial condition of State Banks.

The insurance statistics are prepared by the California Department of Insurance. Detailed information is published in the Annual Report of the Insurance Commissioner, available from the Department.

SECTION O.

PUBLIC FINANCE

Data relating to the financial operation of governmental agencies in California are summarized in this section. The information is arranged according to the level of government, starting with the Federal and running through special districts. In general the purpose is to present figures on revenues, expenditures and debt, with additional details on each of these subjects where these can be readily prepared in summary form. Supplementary information is available in the files and records of the several contributing agencies.

A warning should be given against adding either revenues or expenditures of the several governmental levels and treating the result as the aggregate income or outgo of governments in California. A great deal of money passes from one level to another in the form of subventions and other intergovernmental payments. Consequently there is a substantial duplication in these figures which can be eliminated only after careful examination of the various items involved. Differences among governmental agencies in accounting practices, especially in regard to disbursements from proceeds of bond issues, also will require attention in using these data.

Federal taxation and expenditures. Annual reports of the United States Commissioner of Internal Revenue are the source of statistics on Federal tax collections in California. Collections within a particular state are not an accurate measure of the burden of Federal taxes paid by the people of that state. For example, 60 percent of the cigarette tax is collected in North Carolina and more than 80 percent of the motor vehicle excise tax is paid in Michigan. But the burden of these taxes is carried by cigarette smokers and vehicle users in all states. The ratio of Federal tax collections to the burden of Federal levies varies with changes in the tax structure, economic conditions and other factors. In general, however, the burden upon Californians exceeds the volume of Federal taxes collected here by ratios ranging between 10.4 percent [1] and 17.4 percent.[2] One of the most recent surveys indicated that in 1957-58 the estimated burden of Federal taxes in California exceeded gross collections by 13.6 percent.[3]

Data on Federal tax refunds, by states, are available for the last four fiscal years and they show an average refund of 9 percent of gross collections in California. This ratio should be kept in mind in connection with the data in Tables O-1 and O-2 which are reported on a gross basis.

Complete data on Federal expenditures by states are not available, but payments by the Federal government to state and local governments and transfer payments to individuals, organizations etc. are reported by states in the *Annual Report of the Secretary of the Treasury on the State of the Finances.* Amounts for California in selected recent years have been transcribed in two tables for this section. Attention is

[a] Receipts in the various states do not indicate the Federal tax burden, since taxes collected in one state are, in many instances, borne by residents of another. For exnmple, the withholding tnxes reported by employers situated near state boundaries include eubstantinl amounts withheld from salnries of employees residing in neighboring states. Data for 1961 through 1964 indicate that approximately 9 percent of gross collections in California are refunded.

[b] Individual income and employment taxes, reported sepnrately through 1951, cannot be eegregated in recent reports.

General note: Original reports from which these dnta were compiled contnin extensive footnotes. These should he consulted by users interested in continuity of these series, compnrnbility and other details.

directed to the numerous footnotes in each annual report which because of space limitations cannot be repeated in this Abstract.

State revenues, expenditures and bonded debt. The summaries here presented are based upon budget classifications of State revenues and expenditures, with total income and outgo carried back to the 1929-30 fiscal year and detail provided for the period since 1950. Additional information may be obtained from the *Annual Report of the State Controller* and the *State Budget*. The last two entries shown in each table are estimates contained in the Governor's Budget as submitted to the Legislature.

Aggregate fiscal year revenues, segregated by general and special funds, are shown in Table 0-6. For the most part, general fund receipts are derived from broad levies and charges not earmarked for particular purposes, while special fund receipts are dedicated for use in special services. Sales, personal income and corporation taxes are examples of the former; motor vehicle taxes and fees, which must be used for activities related to highways, roads and streets, are the leading special fund levies. Receipts from some revenue sources are apportioned by law between the general fund and certain special funds. Since 1929-30 there have been a few changes in the fund designation of receipts, and in this respect the totals are not strictly comparable throughout the period covered.

Table 0-7 shows revenue collections from each of the principal sources, without regard to fund. Amounts represent accruals during the year to the collecting agency. Permit fees required in connection with such levies as the sales and motor vehicle fuel taxes are included with other receipts from these levies.

Expenditure data are summarized in accordance with the three principal sections of the budget; (1) State operations, which includes the expense of maintaining the various departments, boards, commissions and offices—including the legislative and judicial branches; (2) capital outlay—representing the cost of acquiring land, constructing and equipping new facilities, highway construction and similar expenditures; and (3) local assistance, which comprises State payments to local governments. Under State accounting practice, disbursements from proceeds of bond

[b] Includes undistributed depositary receipts and unclassified advance payments of excise taxes.

General note: Numerous changes in tax laws and reporting procedures have occurred during the period covered by these data. For the most part these are explained in footnotes contained in annual reports of the Commissioner of Internal Revenue, which should be consulted for such technical details. Detail may not add to totals because of rounding.

Department of Finance
Budget Division

issues are treated as expenditures at the time the bonds are redeemed. Hence, initial payments from bond funds are not included in these totals.

Expenditures for the principal functions of government include amounts for all three of the general purposes mentioned above—State operations, capital outlay and local assistance.

The functional classification of State expenditures was revised in 1962 in order to conform this reporting so far as possible to the agency concept of governmental organization. The new classification is shown in Table O-9. Detailed information regarding the activities and services comprising each function may be obtained from budget summaries.

Information regarding the State's bonded debt, as reported by the State Treasurer, is arranged to show both the general trend since 1950 and a detailed statement of the California State bonded debt as of June 30, 1968. Short term obligations are not included.

The State Treasurer and the California Bonding Picture—The State Treasurer has duties and responsibilities set forth both by the Constitution and by statute. Serving as banker for the State she receives all state revenues into the State Treasury and provides for the redemption of all state warrants. Her responsibility includes the determination of the cash needs of the State on a daily basis and for the investment of all surplus funds.

The investment earnings on the funds and accounts invested by the Treasurer earned in excess of $75 million during the 1967–68 fiscal year. Interest earned on investments is credited to the general fund and other funds of state government as provided by law.

The trust functions of the State Treasurer's Office, providing for the safekeeping of all state-owned securities and other personal property, increased steadily during the year. On June 30, 1968, securities held for state funds, deposited by banks to secure bank deposits and all pledges with state agencies and other safekeeping items, totaled over $7.0 billion.

All state general obligation bonds authorized by the people are prepared, sold, serviced and redeemed by the State Treasurer. Of the $4.6 billion bonds outstanding on June 30, 1968, approximately 60 percent is represented by self-liquidating bonds serviced by certain earmarked receipts other than general tax sources. In the 1967–68 fiscal year, state bond sales totaled $500 million. The bids received on bond offerings continued to compare favorably with the national municipal bond averages.

Water Development Program Bonds—A total of $950 million of the $1.75 billion general obligation bonds authorized by the voters in 1960 under the Burns-Porter Act had been sold as of June 30, 1968. The Burns-Porter Act dedicates certain revenues of the project, remaining after provision for the expense of operation, maintenance and replacements, to the payment of the principal of and interest on the Water Bonds.

State School Building Aid Bonds—The continued population growth contributes to the demand for additional new classroom facilities for local elementary and high schools. The loans to local school districts remain fairly constant. Since its inception in 1947, some 55,000 classrooms housing 1.8 million pupils have been provided under this program. By June 30, 1968, a total of $1.615 billion in school building aid bonds had been sold of the $1.890 billion authorized by the electorate since 1949.

State Construction Program Bonds—The population growth combined with the accumulated need to modernize and replace existing older facilities required a construction program of a magnitude unmatched by any other state. A total of $990 million of Construction bonds had been sold as of June 30, 1968, of the $1.05 billion authorized.

Higher Education Construction Program Bond Act of 1966—The electorate in 1966 approved a $230 million bond issue to provide construction of facilities for the University of California and the State College System. A total of $150 million of this issue was sold prior to June 30, 1968.

Veteran's Farm and Home Loan Bonds—This program has been entirely self-supporting since its inception, with the administration costs, bond redemptions and interest payments covered by veterans loan repayments. Since 1921 over 234,000 loans have been made to qualified California Veterans. As of June 30, 1968, $1.256 billion of the Veteran's bonds sold remain outstanding.

Harbor Development Bonds—Of the $60 million bond issue authorized by the voters in 1958, for harbor development, $50 million was designated for the San Francisco Port Authority. On June 30, 1968, $7.5 million of the authorized bonds remained unsold.

Ten million dollars of the 1958 issue was made available for loans to cities, counties and districts for small craft harbors and related facilities. These bonds are also self-liquidating, as the revenue received for operation of the small craft facilities will repay the principal and interest on the bonds.

State Beach, Park, Recreational, and Historical Facilities Bonds—During 1965 the first bonds were offered for sale of the $150 million program to acquire and develop the state's outdoor recreational facilities approved by the people in 1964. The program provides that $85 million will be allocated for acquisition of property for the state park system and $40 million for grants to local governments for acquisition and development of property for park and beach purposes. In addition $20 million would be made available for minimum development of the property acquired for the state park and beach system, and $5 million to acquire and develop property for wildlife management. As of June 30, 1968, $75 million of the authorized total of bonds had been sold.

Source: Data for 1930–45 from *Biennial Report of the State Controller,* except capital outlay for highways, not segregated in the Controller's reports, from *Seventh Annual Report of the Division of Highways,* page 234. In determining highway capital outlay, contributions from nonstate sources were excluded. The resulting estimate for each year was deducted from total highway expenditures as reported by the Controller, and the remainder was treated as maintenance, administrative expense, etc., included under "state operations." Data for the period since 1945 from state budgets. All figures adjusted to present budget classifications.

[a] The functional classification of State expenditures was revised in 1962 to conform more closely to the agency concept of governmental organization. For further description of the series, see 1967 *Abstract,* Table O-8, page 222.

[b] Based on actual expenditure figures as released by the State Controller. However, the State Highway Fund is not included in the Controller's preliminary report. The 1968 estimate for this component, published in the 1969 Budget, has therefore been used.

[a] Includes utility roll, and locally-assessed secured and unsecured rolls at county assessment levels.
[b] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school levies.
[c] Excludes special assessments levied on limited categories of property to finance activities from which owners of such properties derive special benefits.
[d] Numbers may not add to totals because of rounding.
[e] Computed by dividing total levies by the assessed value and multiplying by 100.

TABLE O-19

AVERAGE TANGIBLE PROPERTY TAX RATE,[a] BY LEVEL OF GOVERNMENT, 1951–68

(Rate per $100 of assessed value)

Fiscal year	Total levies[b]	City and County of San Francisco levies	Other county levies[c]	Other city levies[d]	School district levies[c]
1950–51	$5.81	$4.67	$2.02	$1.72	$2.36
1951–52	5.74	4.52	1.88	1.71	2.42
1952–53	5.79	4.13	1.86	1.69	2.52
1953–54	5.94	4.47	1.94	1.73	2.54
1954–55	6.15	5.14	1.97	1.72	2.67
1955–56	6.27	5.25	2.04	1.67	2.72
1956–57	6.49	5.10	1.93	1.66	3.05
1957–58	6.72	5.26	1.99	1.61	3.32
1958–59	6.96	5.61	2.06	1.56	3.37
1959–60	7.26	5.95	2.11	1.61	3.56
1960–61	7.42	6.18	2.11	1.59	3.69
1961–62	7.65	6.13	2.13	1.58	3.89
1962–63	7.82	6.83	2.18	1.60	3.97
1963–64	8.00	6.29	2.20	1.61	4.12
1964–65	8.31	6.39	2.29	1.61	4.31
1965–66	8.53	6.91	2.33	1.58	4.46
1966–67	8.84	7.16	2.35	1.60	4.70
1967–68	8.90	5.92	2.41	1.58	4.75

[a] Computed by dividing the total taxes levied by each level of government by the net total assessed value of tangible property within its jurisdiction.
[b] Includes the rates of special district taxes, which are not separately shown.
[c] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school district levies.
[d] Computed by dividing city tax levies by the assessed value of tangible property inside cities as shown on county assessment rolls. Slightly lower rates would result from the use of assessed values as shown on city assessment rolls in the cities which do their own assessing. For example, in 1962–63, the average city rate was $1.54 when computed by the latter method.

1959–60	2,207,656	2,194,793	2,995,527				

[a] The information in the series is not strictly comparable. For the fiscal years through 1952–53 information is taken from the report prepared by counties, including only selected districts and not, in all cases, all of the information concerning the activities of a given district. For the fiscal years 1953–54 to date, the information is taken from separate reports of the financial transaction of districts. For districts other than school districts, the types of districts included were increased from fiscal year 1953-54 through 1955-56 as the program of the reporting for districts was expanded. The figures for bonded indebtedness include time warrants as well as certain long term contractual obligations between special districts and the Federal Bureau of Reclamation.

[b] Indebtedness for school and special districts from fiscal year 1953-54 to date include school purpose bonds which are an obligation of the City and County of San Francisco and not of the school district. Listing within this table is for information purposes only. For 1953-54, $44,405,000; 1954-55, $45,826,000; 1955-56, $43,147,000; 1956-57, $41,458,000; 1957-58, $44,289,000; 1958-59, $44,115,000; 1959-60, $46,840,000; 1960-61, $44,990,000; 1961-62, $44,225,000; 1962-63, $38,690,000; 1963-64, $33,015,000; 1964-65, $29,275,000; 1965-66, $24,570,000; 1966–67, $24,285,000.

Office of State Treasurer

SECTION P.

ELECTIONS

Information relating to registrations and voting is presented in this section. In interest of space the data are limited to registrations, by principal political parties, the total vote cast, and a statement of the vote for major candidates for the offices of President, United States Senator from California, and the constitutional officers of this State. A complete accounting of registrations, the vote for all candidates (including representatives in Congress, State senators, assemblymen and judicial officers) and the vote cast for and against all ballot propositions is given by the Secretary of State in *Statement of Vote*, a booklet issued after each primary and general election.

All eighty members of the Assembly and all forty State senators were elected in 1966. Senators from odd-numbered districts, 1 through 39, were elected for a 2-year term. In 1968 they will be elected for 4-year terms. Senators from even-numbered districts, 2 through 40, were elected for 4-year terms, their next election being in 1970. Thus, beginning in 1968, one-half of the senators will be elected for 4-year terms every two years. Constitutional officers are elected for four-year terms in the even numbered years which are not leap years. There is a vote on high elective office, either presidential or gubernatorial, at each general election.

According to reports of the United States Bureau of the Census, there were 7,092,000 civilians in California aged 21 years and over on April 1, 1950. Registrations for the general election of that year totaled 5,244,837 and there were 3,845,757 votes cast. Registration for the general election of 1966 totaled 8,340,868 and there were 6,605,866 votes cast. It must be recognized that civilian population and registrations are not entirely comparable. Some individuals of proper age do not possess other voting qualifications and members of the Armed Forces may vote, if they have the residence and other qualifications. However, these population figures provide a general background against which to interpret registration and voting data.

TABLE P-1

REGISTRATION AND VOTE CAST IN CALIFORNIA, PRIMARY ELECTIONS, 1930–68

Year	Registration				Vote cast
	Total	Democratic	Republican	Other[a]	
1930	2,187,474	449,824	1,599,413	138,237	1,301,847

Secretary of State

SECTION Q.

COMPARATIVE STATISTICS

This section compares California with the other 49 states and the entire United States for several major economic indicators: resident population; nonagricultural employment; hours and earnings in manufacturing; personal income; defense-aerospace contracts; manufacturing activity; wholesale and retail trade; selected services, and agriculture.

Population data are summarized from the Bureau of the Census, *Current Population Reports* (P-25, No. 348). Employment and hours and earnings series are taken from *The Consumer Price Index*, released by the Bureau of Labor Statistics. Personal income data were published in the August 1967 issue of the *Survey of Current Business*. Defense-aerospace contracts appear in the Department of Defense (DOD) *Prime Contract Awards by State* (quarterly) and the National Aeronautics and Space Administration (NASA) *Annual Procurement Report*. Data for the manufacturing, trade and service categories are taken from publications covering the 1963 Census of Business, conducted by the Department of Commerce, Bureau of the Census and the 1966 Survey of Manufactures. More detailed information is available by refering directly to the Census reports. Cash farm receipts are published in the *Farm Income Situation* of the U.S. Department of Agriculture.
